The long tradition of Kierkegaard studies has made it impossible for individual scholars to have a complete overview of the vast field of Kierkegaard research. The large and ever-increasing number of publications on Kierkegaard in the languages of the world can be simply bewildering even for experienced scholars. The present work constitutes a systematic bibliography which aims to help students and researchers navigate the seemingly endless mass of publications. The volume is

divided into two large sections part i which covers tomes i v is dedicated to individual bibliographies organized according to specific language this includes extensive bibliographies of works on kierkegaard in some 41 different languages part ii which covers tomes vi vii is dedicated to shorter individual bibliographies organized according to specific figures who are in some way relevant for kierkegaard the goal has been to create the most exhaustive bibliography of kierkegaard literature possible and thus the bibliography is not limited to any specific time period but instead spans the entire history of kierkegaard studies
