where religious belief and scientific belief formerly stood in direct conflict to the point even of being mutually exclusive one now sees promise for a new compatibility perhaps even harmony from back cover

this book does not only attempt to clarify concepts used in the context of dialectical reasoning but also develops an epistemological theory by answering the question what does it mean to possess a language the epistemological theory then is used to ground the basis of social science in the logic of our common sense language this logic is viewed as more comprehensive than traditional formalized logic which is viewed as only one though an important aspect of the more general and basic logic of our common sense language

scientific discourse is rooted in the close interplay between human cognition and communication accordingly the volume focuses on central aspects of this relationship and the variety of the approaches which are intended to capture these aspects the book is divided into two related parts the papers of the first part deal with textual issues whereas those of the second raise epistemological problems as a result the volume is a rich and many sided contribution to our understanding of how scientific knowledge is constructed and manifested in discourse
