This is done through OHE's general reports on the state of history teaching in Europe and OHE's thematic reports which explore particular areas of interest and how they are treated in history lessons. The second thematic report of the OHE investigates the extent and the ways in which learners are being prepared to understand and cope with such crises through history education in the public schooling systems of OHE's 17 member states. It combines curriculum and textbook analysis with an explorative study of teachers' experiences and summarises its most significant conclusions into 10 key findings listed in the introductory chapter.

After it emerged as a market commodity in the 18th century, coffee was easily adapted to cultivation in the highlands of Central America. Guatemala, in particular, has relied on coffee cultivation as a part of its economic identity. It has been a premier export crop for over 300 years. The importance of coffee to the country lies in the large labour investment in each stage of production. The book covers agricultural, social and cultural aspects of coffee culture in Guatemala. In old photographs, charts, tables and maps, Wagner's work shows how Guatemala has met the economic complexity to which this product is subject and why coffee remains the solid foundation crop of the country today.
