trade is a cornerstone concept in economics worldwide this updated second edition of the essential graduate textbook in international trade brings readers to the forefront of knowledge in the field and prepares students to undertake their own research in advanced international trade robert feenstra integrates the most current theoretical approaches with empirical evidence and these materials are supplemented in each chapter by theoretical and empirical exercises feenstra explores a wealth of material such as the ricardian and heckscher ohlin models extensions to many goods and factors and the role of tariffs quotas and other trade policies he examines imperfect competition offshoring political economy multinationals endogenous growth the gravity equation and the organization of the firm in international trade feenstra also includes a new chapter on monopolistic competition with heterogeneous firms with many applications of that model in addition to known results the book looks at some particularly important unpublished results by various authors two appendices draw on index numbers and discrete choice models to describe methods applicable to research problems in international trade completely revised with the latest developments and brand new materials advanced international trade is a classic textbook that will be used widely by students and practitioners of economics for a long time to come updated second edition of the essential graduate textbook current approaches and a new chapter on monopolistic competition with heterogeneous firms supplementary materials in each chapter theoretical and empirical exercises two appendices describe methods for international trade research

advanced international trade is the first major graduate textbook in international trade in a generation trade is a cornerstone concept in economics taught in all departments both in the united states and abroad the past twenty years have seen a number of new theoretical approaches that are essential to any graduate international trade course and will be of interest in development economics and other fields here robert feenstra steps beyond theory to consider empirical evidence as well he covers all the basic material including the ricardian and hecksher ohlin models extension to many goods and factors and the role of tariffs quotas and other trade policies recent material including imperfect competition outsourcing political economy multinationals and endogenous growth and new material including the gravity equation and the organization of the firm in international trade throughout the book special emphasis is placed on integrating the

theoretical models with empirical evidence and this is supplemented by theoretical and empirical exercises that appear with each chapter advanced international trade is intended to bring readers to the forefront of knowledge in international trade and prepare them to undertake their own research both graduate students and faculty will find a wealth of topics that have previously only been covered in journal articles and are dealt with here in a common and simple notation in addition to known results the book includes some particularly important unpublished results by various authors two appendices describe empirical methods applicable to research problems in international trade methods that draw on i index numbers and ii discrete choice models thoroughly up to date and marked by clear straightforward prose this book will be used widely and enthusiastically

this book is a brilliant exploration of the implications of recent theories of international trade for one of the most important questions in the field how large are the gains from trade feenstra takes the models apart to shed light on the basic mechanisms at play and then masterfully uses the data to understand their quantitative significance andrts rodriquez clare professor of economics pennsylvania state university book jacket

a guide to literature and bodies concerned with the procedures and policies of conducting business with other countries title page

in the context of the emerging measures to combat climate change this study examines the competitiveness of energy intensive industries in oecd countries and barriers to clean energy technology diffusion in developing countries building on this analysis it proposes multilateral actions under the wto that will be beneficial from both a trade and a climate change perspective

there has long been a need for a systematic introduction to the modern pure theory of international trade that would take the student through a careful introduction to the tools of analysis and the main logical propositions into the application of the theory to practical problems of international economic policy trade theory should be part and parcel of price theory

distinguished only by the fact that other countries form part of the natural opportunities and natural constraints that a country confronts in its efforts to bend nature to its desire to produce utility yielding goods and services but its exposition is often confused by the attachment of its expositors to obsolete problems and backward analytical techniques this book covers in detail classical neoclassical and modern theories of international trade with special attention to problems of equilibrium growth and welfare and discusses the work of all major contributors in this field from ricardo and mill through meade heckscher and ohlin to the growth models of johnson solow and uzawa all problems are clearly stated and the easiest and most convenient solutions are sought in each case with the more technical topics in the field discussed in several chapters and appendixes that may be omitted for less advanced students without interrupting the continuity of the book the book s coverage is complete and entirely up to date it is written primarily for advanced undergraduate and graduate courses in international trade but it will also serve as an important reference tool for professional economists working in this field and will be of considerable interest to students and practitioners dealing with problems of economic development and international business relationships more generally

multiades chacholiades studied at the athens school of economics and business science in athens greece and received his doctorate from the massachusetts institute of technology he has taught at new york university and the university of california in los angeles and is presently professor of economics at georgia state university his articles have been published in a number of international professional economic journals

in the present text the author deals with both conventional and new approaches to trade theory and policy treating all important research topics in international economics and clarifying their mathematical intricacies the textbook is intended for undergraduates graduates and researchers alike it addresses undergraduate students with extremely clear language and illustrations making even the most complex trade models accessible in the appendices graduate students and researchers will find self contained treatments in mathematical terms the new edition has been thoroughly revised and updated to reflect the latest research on international trade

first published in 1967 routledge is an imprint of taylor francis an informa company
