quantum information may sound like science fiction but is in fact an active and extremely promising area of research with a big dream to build a quantum computer capable of solving problems that a classical computer could not even begin to handle research in quantum information science is now at an advanced enough stage for this dream to be credible and well worth pursuing it is at the same time too early to predict how quantum computers will be built and what potential technologies will eventually strike gold in their ability to manipulate and process quantum information one direction that has reaped many successes in quantum information processing relies on continuous variables this area is bustling with theoretical and experimental achievements from continuous variable teleportation to in principle demonstrations of universal computation and efficient error correction now the time has come to compile some of the major results into one volume in this book the leading

researchers of the field present up to date developments of continuous variable quantum information this book is organized to suit many reader levels with introductions to every topic and in depth discussions of theoretical and experimental results

this book examines the extent to which german foreign policy has changed since unification and analyzes the fundamental reasons behind this change the book has three main aims the essays develop theories of foreign policy to predict and explain germany s foreign policy behavior they test competing predictions about german foreign policy behavior since unification in several issue areas they also assess the much debated question as to whether post unification germany s foreign policy is marked by continuity or change

this book analyses india and pakistan s decision to go nuclear against the odds of nuclear non proliferation treaty based nuclear order it reflects upon the key factors that contributed to and the process that prompted india and pakistan s nuclear programmes to take a military orientation which eventually culminated in the may 1998 nuclear tests it also explains the motivation which underscored both india and pakistan s determination to advance nuclear postures in 1998 that appeared to be inconsistent with the post cold war global strategic environment further this book explains why international and regional nuclear non proliferation regimes were ineffective in preventing india and pakistan from going nuclear

in the context of massive environmental problems in southeast asia the countries in the region have decided at least in some instances to create regimes to solve these problems jointly this empirical observation is surprising given the southeast asian countries general reluctance to regional cooperation the governance and budgetary constraints that are typical for developing countries and the huge heterogeneity of the involved countries in terms of environmental vulnerability economic capacity and hegemonic power this book analyzes the creation and effectiveness of two environmental regimes one on transboundary haze pollution and a second on resource management of the mekong it will be shown that regime creation is extremely problematic and strategies to overcome conflicting actor constellations are mostly lacking
