energy costs impact the profitability of virtually all industrial processes stressing how plants use power and how that power is actually generated this book provides a clear and simple way to understand the energy usage in various processes as well as methods for optimizing these processes using practical hands on simulations and a unique approach that details solved problems utilizing actual plant data invaluable information offers a complete energy saving approach essential for both the chemical and mechanical engineering curricula as well as for practicing engineers

micro and nanofluid convection with magnetic field effects for heat and mass transfer applications using matlab examines the performance of micro and nanofluids with various physical effects such as magnetic field slip effects radiation and heat sources heat and mass transfer enhancement techniques are widely used in many applications in the heating and cooling or freezing process to make possible a reduction in weight and size or enhance performance during heat and mass exchanges the book covers the two categories of flow techniques active and passive it discusses various considerations in the engineering sciences in the melting process polymer industry and in metallurgy to be more precise it may be pointed out that many metal surgical developments involve the cooling of continuous strips or filaments by drawing them through a quiescent fluid and in that process of drawing these strips are sometimes stretched in all these cases the properties of the final product depend to a great extent on the rate of cooling by drawing such strips in an electrically conducting fluid subject to a magnetic field and thermal radiation provides information about the governing equations for all three types of flow geometries explains micro polar fluid flow modeling offers detailed coverage of boundary value problems using matlab

globalization has been a central theme in political economic cultural and religious debates since the turn of the century while some see it as a solution others consider it the root of our problems the intensification of cultural and military warfare and the west v the rest mentality fuels a deep seated ethnocentrism religion meanwhile faces scrutiny from various fundamentalisms and grand narratives many modern muslim thinkers are skeptical of globalization perceiving it as a homogenizing force that spreads western culture and concentrates power among a few nations they argue that islam promotes human oneness and provides an intellectual and spiritual framework for a more civilized and universal approach to globalization opposing the western centric hegemonic tendencies the goal of this book is to demonstrate that islam favors globalization in its original voluntary form as opposed to the violent imposition of the west on the east it will examine muslim responses to globalization and their attempts to find global answers to local problems in their own local regional national and global contexts several academic works have explored various aspects of globalization focusing on tensions and conflicts such as power politics religious authority and legislative issues however there is a notable absence of attention given to the islamic perspective on globalization including both appreciation and critique this book addresses this gap by offering not only a muslim critique of globalization but also a broader framework for understanding islam s unique perspective on globalization does globalization support the inclusivity that islam advocates how does islam fit into the globalization era what impact and influence may muslims have on the future of globalization what unique prospects does globalization provide muslims and the islamic faith is islamic revivalism a reaction to globalization alternatives to globalization could exist what kind of structure will the islamic globalization paradigm have in addition to addressing these questions the book attempts to provide a theoretical framework for islamic globalization which incorporates the shuratic practice and the vision of an international community extending beyond the arabs and non arabs this underscores the importance of historical contexts for contemporary actions and

beliefs in the process the book attempts to extend the debate on islam and globalization by mapping out the effects of globalization on various aspects of muslim culture
