excerpt from an alphabet of economics the following alphabet grew out of an attempt to compile a glossary of economic and political terms for the use of readers of the new age in general and of students of the system of national guilds in particular it developed however into a more or less systematic attempt to define economics in terms of the wage system and at the same time to suggest an alternative to it though fragmentary therefore in appearance it will be found to contain a consistent criticism of current economic theory a consistent exposition however inadequate of the economic theory held by the new school of national guildsmen and consistent suggestions somewhat shadowy it is true towards a social reconstruction it has long been realised that modern industry depends for its main motive upon the desire for gain and hence that profit cering or production for the sake of

profit is an accurate description of it it has long also been realised that in thus permitting production to be carried on from an irrelevant motive we were admitting an ethical contradiction into the practices of the state at the same time since economists by means of their analysis of the factors of production found themselves unable to detect any intellectual defect in the system the ethical defect was assumed to be either a passing phenomenon to be remedied by education or inherent in human nature nothing they concluded was wrong in the theory of economics hence nothing could be wrong in the practice unless it were due to factors outside economic control economic theory in short was assumed to be able to leave the court where it had been charged with the crimes of modern industry without a stain upon its character to this however it was not possible that everybody always should agree and in fact as the history of socialist criticism shows there have always been protestants and dissentients who maintain that what is right in theory cannot be wrong in practice and that what is wrong in practice must needs therefore be wrong in theory without attempting in this place to resume the course of such a criticism or to review the successive hypotheses upon which such criticisms have rested themselves it may be said that the common sum of them is to be found and is assumed in the definitions herein contained the issue turns it will be seen upon the original analysis of the factors of production from which if we accept the current conception all the consequences of modern industry flow and which therefore must be re-examined if we are to build our industry upon a new foundation about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at [forgottenbooks.com](http://forgottenbooks.com) this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
