this volume contains papers on linguistic historiography ranging chronologically from ancient greece to the present and covering philosophical social and political aspects of language as well as the study of grammar in the narrow sense the work opens with the report on a round table discussion of problems in translating ancient grammatical texts the remainder of the volume is arranged in chronological sections with contributions as follows
ii classical and medieval iii seventeenth century iv eighteenth century v nineteenth century vi twentieth century

parameters have lain at the core of linguistic research in the generative tradition for decades the theoretical questions they have raised are deep and broad this reference text investigates how contemporary linguistics has best tried to answer them this book looks at how parameters might be properly defined and what their locus might be lexical information functional heads the computational system the phonological branch of the grammar what kind of data forms trigger acquisition of a parameter are parameters necessary or can we study languages without making reference to them the questions looked at are not just theoretical how can a theory of parameters be used to help understand second language acquisition and what contributions can it make to the study of language typology this is the right time to gather all this information dispersed in many different kinds of publications by single authors and groups into one comprehensive volume

the present volume is a broad overview of methods and methodologies in linguistics illustrated with examples from concrete research it collects insights gained from a broad range of linguistic sub disciplines ranging from core disciplines to topics in cross linguistic and language internal diversity or to contributions towards language space and society given its critical and innovative nature the volume is a valuable source for students and researchers of a broad range of linguistic interests

this book contributes to opening up disciplinary knowledge and offering connections between different approaches to language in contemporary linguistics rather than focusing on a particular single methodology or theoretical assumption the volume presents part of the wealth of linguistic knowledge as an intertwined project which combines numerous practices positionalities and perspectives the editors believe together with the contributors to this volume that it is a crucial and timely task to emphasize the relevance of linguistic knowledge on power hospitality social class marginalization mobility history secrecy the structures of discourse and the construction of meaning as knowledge that needs to be brought together as it is brought together in personal discussions conversations and encounters to work along traces of linguistic connectivity marginalized narratives in and on lesser studied often stigmatized language practices and to shed light on the tasks of linguistics in making diverse knowledges transparent this offers spaces for critical discussion on the ethics of linguistics its challenges contributions and tasks these are the approaches that are characteristic for the work of alexandra y aikhenvald to whom this book is dedicated

in a controversial look at the study of linguistics today mortéza mahmoudian examines twentieth century theories of language in light of empirical evidence in the past linguists have had to choose between a general linguistic theory aimed at universal explanatory power and specific limited linguistic models arguing that at various levels of linguistic analysis different theories offer more or less explanatory power mahmoudian makes a persuasive case for an integrated approach incorporating the strengths of both methods the author begins with the identification of principles which despite differences in terminology are held in common by most twentieth century linguists he shows the implications merits and shortcomings of the major schools of linguistic thought as well as the techniques one can use in gathering data ranging over a wide variety of international linguistic thinking mahmoudian takes up the question of what he calls experimentation or the extent to which the application of certain linguistic theories have validity in constructing models simultaneously a survey of the current state of linguistic theory and a case for the necessity of empirical verification in linguistics modern theories of language builds a bridge

across the gulf between many long standing conflicts in the theory of language accessibly written this provocative work predicts future theoretical and epistemological developments and will prove essential reading for students and scholars of linguistics as well as specialists in cognitive psychology and romance languages
