today s world is complex and getting more so each day huge multinational corporations international crisis and fast breaking events require most people to make decisions on a daily basis without the tools to understand the long term impact that today s decision might create because most people have never really been trained in how to make important complex decisions most people rely on experience and gut reaction which is okay for many decisions but not okay for decision that will have meaningful impact on organizations and individual decision makers need to develop the art and science of strategic decision making here professor thomas martin explains the need for decision makers to modify their thinking about how they deal with acquiring and analyzing information in each of the decision making process steps this approach requiring thinking modification will lengthen the process make it more complex and to some more arduous but the comprehensiveness of the new thinking approach should lead to improved and more effective decision making in this book dr martin presents a thinking modification framework that asserts that in the decision making process there are three situational states a current state future state and a transitional state that one must deliberate in finding a solution for each of these

situational states martin develops an identical five step process to determine the best decision to make the steps of this process include change needing situational analysis challenge framing causal analysis generating solution ideas choosing a solution set implementation and aftermath planning this book will appeal to decision makers leaders and students of management who want a specific framework that details the process behind making strategic well informed decisions

why do the people in some companies continually dazzle us with their brilliant decisions while those in others make one blunder after another do they understand their businesses better are they just plain smarter or is it all a matter of luck the answer says j frank yates is none of the above the real key rarely recognized is how the leaders manage the company s decision processes the leaders decision management practices drawing on his thirty years of research and experience as well as scholarship from psychology economics statistics strategy medicine and other fields to explain the fundamental nature of business decision problems yates highlights the ten cardinal decision issues crucial to managing the decision making process and ultimately better company decisions he covers problems ranging from recognizing whether a decision is actually called for to assuring that a preferred course of action will be implemented he shows how solid decisions result when managers ensure that deciders resolve every cardinal issue effectively for every decision problem facing the company he also reveals how conversely chronically poor decisions are traceable to managers allowing or even creating conditions that encourage deciders to fall short in how they address at least one of those critical issues

in the second edition of rational choice in an uncertain world the authors compare the basic principles of rationality with actual behaviour in making decisions they describe theories and research findings from the field of judgment and decision making in a non technical manner using anecdotes as a teaching device intended as an introductory textbook for advanced undergraduate and graduate students the material not only is of scholarly interest but is practical as well the second edition includes more coverage on the role of emotions happiness and general well being in decisions a summary of the new research on the neuroscience of decision processes more discussion of the adaptive value of non rational heuristics expansion of the graphics for decision trees probability trees and venn diagrams

should i have this medical treatment or that one is this computer a better buy than that one should i invest in shares or keep my money under the bed we all face a perplexing array of decisions every day thoroughly revised and updated throughout the new edition of straight choices provides an integrative account of the psychology of decision making and shows how psychological research can help us understand our uncertain world straight choices emphasises the relationship between learning and decision making arguing that the best way to understand how and why decisions are made is in the context of the learning and knowledge acquisition which precedes them and the feedback which follows the mechanisms of learning and the structure of environments in which decisions are made are carefully examined to explore their impact on our choices the authors then consider whether we are all constrained to fall prey to cognitive biases or whether with sufficient exposure we can find

optimal decision strategies and improve our decision making featuring three completely new chapters this edition also contains student friendly overviews and recommended readings in each chapter it will be of interest to students and researchers in cognitive psychology behavioral economics and the decision sciences as well as anyone interested in the nature of decision making

decisions and problems can often leave people with a dilemma knowing that a decision is required but uncertain how to ensure that it is the best one and that it will be successfully executed the paradox is that the very pressure for a decision often breeds indecisiveness think on your feet addresses this fundamental problem enabling you to find the best solutions and options avoid pitfalls managerisk work with people to ensure that decisions succeed and understand how you can improve the way you typically operate when making decisions

this title looks at the nature of problems and decisions recognising defining and analysing the problem as well as classifying problems as operational tactical or strategic being able to recognise relative urgency and importance developing valid options and finding the best solution

the book is intended as a primer and discusses the main areas within judgment and decision making however these topics are not siloed instead a narrative arc throughout the book has a higher level of critical appraisal of the key concepts and how they relate to some of the big questions about the nature of human rationality the book begins by introducing two perspectives on rationality the first describes how we decide on the goodness of a decision this is a surprisingly recent concept called rational choice theory which was formed from a collection of books written around the time of the second world war that deal with how we think about risk as a probability and goodness as utility in short rational choice theory argues that to be rational people should always make the decision that maximizes subjective expected utility the book goes on to describe the consensus view that emerged in the late 1960s and came to dominate our thinking about decision making namely that people rarely make rational decisions in fact many nobel prizes have been handed out for work showing that humans are not rational creatures e g daniel kahneman richard thaler robert shiller the book concludes with recent theoretical developments in our understanding of how people make decisions that reconcile rational choice theory with human irrationality although aimed primarily at second year undergraduates studying judgement and decision making as a core component of cognitive psychology the book will also be relevant to third year electives in and msc programmes the book will also interest undergraduates studying economics and undergraduates studying more general degrees in liberal arts or natural science as an introductory text the book assumes no prior knowledge of judgement and decision making cognitive psychology or economics however the level of the book assumes that the reader is familiar with academic texts and has experience of critical thinking a key requirement of the reader is a willingness to relate academic concepts to the real world and to try and

understand the bigger picture about human psychology and its place in society

risks are an integral part of complex high stakes decisions and decisionmakers are faced with the unavoidable tasks of assessing risks and forming risk preferences this is true for all decision domains including financial environmental and foreign policy domains among others how well decisionmakers deal with risk affects to a considerable extent the quality of their decisions this book provides the most comprehensive analysis available of the elements that influence risk judgments and preferences the book has two dimensions theoretical and comparative historical the study of risk taking behavior has been dominated by the rational choice approach instead the author adopts a socio cognitive approach involving a multivariate theory integrating contextual cognitive motivational and personality factors that affect an individual decisionmaker s judgment and preferences the social interaction and structural effects of the decisionmaking group and its organizational setting and the role of cultural societal values and norms that sanction or discourage risk taking behavior the book s theoretical approach is applied and tested in five historical case studies of foreign military interventions the richly detailed empirical data on the case studies make them metaphorically speaking an ideal laboratory for applying a process tracing approach in studying judgment and decision processes at varying risk levels the case studies analyzed are u s interventions in grenada in 1983 and panama in 1989 both low risk soviet intervention in czechoslovakia in 1968 moderate risk u s intervention in vietnam in 1964 68 high risk and israel s intervention in lebanon in 1982 83 high risk
