One hundred stereotype maps glazed with the most exquisite human prejudice especially collected for you by Yanko Tsvetkov. Author of the viral mapping stereotypes project, satire and cartography rarely come in a single package, but in the Atlas of Prejudice they successfully blend in a work of art that is both funny and thought provoking. The book is based on mapping stereotypes. Yanko Tsvetkov's critically acclaimed project that became a viral internet sensation in 2009, a reliable weapon against bigots of all kinds. It serves as an inexhaustible source of much needed argumentation and occasionally as a nice slab of paper that can be used to smack them across the face whenever reasoning becomes utterly impossible. The complete collection version of the atlas contains all maps from the previously published two volumes and adds twenty-five new ones, wrapping the best-selling series in a single extended edition.

This volume is addressed to professionals and students in community mental health, including researchers, clinicians, administrators, educators, and students in relevant specialties within the fields of psychology, psychiatry, social work, public health, and nursing. The intent of this book is to serve as a practical resource for professionals and also as a didactic text for students. In addition, the volume seeks to make a theoretical contribution to the field by presenting for the first time in book form a behavioral ecological perspective in community mental health. We present behavioral ecology as an emerging perspective that is concerned with the interdependence of people, behavior, and their sociophysical environments. Behavioral ecology attributes mental health problems to transactions between persons and their settings, rather than to causes rooted exclusively within individuals or environments. In this volume, we advance the notion of behavioral ecology as an integration of two broad perspectives: behavioral approaches as derived from the individual psychology of learning and ecological approaches as encompassing the study of communities, environments, and social systems. Through the programs brought together in this book, we are arguing for a merging of these two areas for purposes of advancing theory, research, and practice in community mental health.
