the story of the man who instigated the work that led to the internet and shifted our understanding of what computers could be behind every great revolution is a vision and behind perhaps the greatest revolution of our time is the vision of j c r licklider he did not design the first personal computers or write the software that ran on them nor was he involved in the legendary early companies that brought them to the forefront of our everyday experience he was instead

a relentless visionary who saw the potential in the way that individuals could interact with computers and software at a time when computers were a short step removed from mechanical data processors. Licklider was writing treatises on human computer symbiosis, computers as communication devices, and a now not so unfamiliar intergalactic network. His ideas became so influential, his passion so contagious, that author Mark Mitchell Waldrop calls him computing's Johnny Appleseed in a simultaneously compelling personal narrative and comprehensive historical exposition. Waldrop tells the story of the man who not only instigated the work that led to the Internet but also shifted our understanding of what computers were and could be. This Stripe Press edition also includes the original texts of Licklider's three most influential writings: *Man-Computer Symbiosis* (1960) which outlines the vision that led to the personal computer revolution of the 1970s; his intergalactic network memo (1963) which outlines the vision that inspired the Internet and the computer as a communication device; and (1968) coauthored with Robert Taylor which amplifies his vision for what the network could become.

*Tristan Dylan and the Dream Machine* is a bedtime book created to spark a child's imagination, inspire positive thinking through the use of bold, vibrant imagery paired with a fun, clever tale. Take a journey with the boys and their father as they explore a world of dreams.
