The Global City Everyday Lives in the Global City The Global Cities Reader The Global City 2.0 Global City Makers The Global City The Global City 2.0 The Global City and the Holy City Global City–Regions Ends of the Global City Urban World/global City Global Cities Global City 2.0 What makes a city “global”? The Changing Face of the Global Cities Global Cities Global Cities and Global Order The Century of Global Cities The City Builders Youth and the City in the Global South *Saskia Sassen Jörg Dürrschmidt Neil Brenner Kristin Ljungkvist Michael Hoyler Theodore Hermann Von Laue Kristin Ljungkvist Tovi Fenster Allen J. Scott Rashmi Varma David Clark Greg Clark Kristin Ljungkvist Zubeda Issa Mohammed Peter Hall Anthony King Simon Curtis Andrea Tobia Zevi Susan S. Fainstein Karen Tranberg Hansen*

in her classic book *The Global City* Saskia Sassen tells how New York London and Tokyo became command centers of the emerging global economy and in the process underwent massive and parallel changes the book reorients the way we think about how cities shape

and are shaped by globalization and provides lessons for the future

rejecting simplifying notions of globalisation as a macro economic force this book provides a grounded picture of the various ways in which people's biographies are tied up with the global cultural economy the main argument of the book is that the globalisation of lives is experienced by people as the extension of their milieux both spatially and symbolically

this book contains fifty selections from classic writings by authors such as john friedmann michael peter smith saskia sassen peter taylor manuel castells and anthony king as well as major contributions by other international scholars of global city formation

global cities all over the world are taking on new roles as they increasingly participate directly and independently in international affairs and global politics so far surprisingly few studies have analyzed the role of the global city beyond its already well explicated role in the globalized economy how is it that local governments of global cities claim international political authority and develop what appears to be their own independent foreign and security policies despite the fact that such policy areas have traditionally been considered to be the core function of nation states and central governments what does it mean to be and to govern the contemporary global city in this book kristin ljungkvist claims that we can better understand why local governments find it to be in their global city's interest to claim international political authority by exploring how the city's role in the globalized world is constructed and narrated locally a core claim is that global city hood as a specific type of collective identity can play a constitutive part in such interest formation combining insights from international relations and urban studies scholarship and with the help of a case study on new york city ljungkvist develops a new analytical framework for studying the global city as an international political actor the global city 2 0 shows that even as the global city engages in various global issues such as global environmental governance or

counterterrorism such pursuit will be framed and rationalized in terms of the city's economic growth the quest for growth and global competitiveness are not necessarily the only available meanings attached to the being and governing of the contemporary global city however there seems to be a remarkable persistency and attraction in economicistic ideas and an economicistic conception of the global city

global city makers provides an in depth account of the role of powerful economic actors in making and unmaking global cities engaging critically and constructively with global urban studies from a relational economic geography perspective the book outlines a renewed agenda for global cities research focusing on financial services management consultancy real estate commodity trading and maritime industries the detailed studies in this volume are located across the globe to incorporate major world cities such as london new york and tokyo as well as globalizing cities including mexico city hamburg and mumbai

global cities all over the world are taking on new roles as they increasingly participate directly and independently in international affairs and global politics so far surprisingly few studies have analyzed the role of the global city beyond its already well explicated role in the globalized economy how is it that local governments of global cities claim international political authority and develop what appears to be their own independent foreign and security policies despite the fact that such policy areas have traditionally been considered to be the core function of nation states and central governments what does it mean to be and to govern the contemporary global city in this book kristin ljungkvist claims that we can better understand why local governments find it to be in their global city's interest to claim international political authority by exploring how the city's role in the globalized world is constructed and narrated locally a core claim is that global city hood as a specific type of collective identity can play a constitutive part in such interest formation combining insights from international relations and urban studies scholarship and with the help of a case study

on new york city Ijungkvist develops a new analytical framework for studying the global city as an international political actor the global city 2 0 shows that even as the global city engages in various global issues such as global environmental governance or counterterrorism such pursuit will be framed and rationalized in terms of the city s economic growth the quest for growth and global competitiveness are not necessarily the only available meanings attached to the being and governing of the contemporary global city however there seems to be a remarkable persistency and attraction in economicistic ideas and an economicistic conception of the global city

the global city the holy city explores the local embodied knowledge of women and men of different national cultural and ethnic identities and age groups living in london and jerusalem their narratives focus on the three main concepts of comfort belonging and commitment to the various spaces in which they live by deconstructing the meanings of these three notions and analyzing their expression in cognitive temporal maps the global city the holy city examines the practicalities of incorporating this kind of local embodied knowledge into the professional planning and management of cities in the age of globalization

there are now more than three hundred city regions around the world with populations greater than one million these city regions are expanding vigorously and they present many new and deep challenges to researchers and policy makers in both the more developed and less developed parts of the world the processes of global economic integration and accelerated urban growth make traditional planning and policy strategies in these regions increasingly inadequate while more effective approaches remain largely in various stages of hypothesis and experimentation global city regions represents a multifaceted effort to deal with the many different issues raised by these developments it seeks at once to define the question of global city regions and to describe the internal and external dynamics that shape them it proposes a theorization of global city regions based on their economic and

political responses to intensifying levels of globalization and it offers a number of policy insights into the severe social problems that confront global city regions as they come face to face with an economically and politically neoliberal world at a moment when globalization is increasingly subject to critical scrutiny in many different quarters this book provides a timely overview of its effects on urban and regional development one of its most important but perhaps least understood corollaries the book also offers a series of nuanced visions of alternative possible futures

this volume of essays explores how the global city is confronting new forms of crises and disruption examining cities in the caribbean north america africa the persian gulf asia and australia the essays use literary and cultural analysis to examine the pasts present and futures of the global city ranging from the period of high postcolonial development industrialization and compacted modernization to present day neoliberal urban planning the collection considers arrivals and departures in the global city offering new critical vocabularies to analyse ongoing processes of migration economic immiseration and environmental collapse

the millennium marked a symbolic transition in the history of human settlement over half of the world's six billion people now live in towns and cities the world is an urban place this book identifies and accounts for the characteristics of the contemporary city and of urban society it analyses the distribution and growth of settlements and explores the social and behavioural characteristics of urban living the latest theoretical and empirical developments and insights are synthesized and presented in an accessible way emphasis throughout is placed upon the world scale urban developments being seen as the geographical consequences of the evolution of capitalism individual chapters focus upon populations and places growth and urbanization urban development as a global phenomenon socio economic consequences of global urban development urban culture and global urban

society world cities and the urban future this second edition has been extensively updated and referenced each chapter includes sets of learning objectives annotated readings and topics for discussion

why have some cities become great global urban centers and what cities will be future leaders from athens and rome in ancient times to new york and singapore today a handful of cities have stood out as centers of global economic military or political power in the twenty first century the number of truly global cities is greater than ever before reflecting the globalization of both economic and political power in global cities a short history greg clark an internationally renowned british urbanist examines the enduring forces such as trade migration war and technology that have enabled some cities to emerge from the pack into global leadership much more than an historical review clark s book looks to the future examining the trends that are transforming cities around the world as well as the new challenges all global cities increasingly will face which cities will be the global leaders of tomorrow what are the common issues and opportunities they will face what kinds of leadership can make these cities competitive and resilient clark offers answers to these and similar questions in a book that will be of interest to anyone who lives in or is affected by the world s great urban areas

the aim of this thesis is to increase our understanding of the global city s pursuit of what can be regarded as independent foreign and security policies despite the fact that such policies have traditionally been considered to be a core function of central governments by studying how the global city s role in the globalized world is constructed in local public narratives as the local government develops and pursues specific international policies the thesis argues we can come closer to an understanding of what it means to be and to govern a global city and why its local government find it to be in the city s interest to claim international political authority a core claim is that global city hood as a specific type of

collective identity can play a constitutive part in such interest formation the study seeks to make three contributions one of empirical nature and two of theoretical nature the empirical contribution involves furthering our understanding of new york city s local role conception as a global city this is also closely related to the first theoretical contribution whereby the case study of new york city as a most important case serves to develop our general understanding of what meanings are attached to contemporary global city hood from a local perspective the second theoretical contribution involves outlining a new way of studying the global city as international political actor by developing an interdisciplinary analytical framework combining insights from the global cities literature studies on urban politics and international relations respectively the analysis shows that even as the global city engages in issues such as global environmental governance or counterterrorism such pursuit will be framed and rationalized in terms of the city s economic growth the quest for growth and global competitiveness are not necessarily the only available meanings attached to the being and governing of the contemporary global city however there seems to be a remarkable persistency and attraction in economicistic ideas and an economicistic conception of the global city

essay from the year 2012 in the subject sociology habitation and urban sociology grade b monash university south africa campus course international studies language english abstract nowadays globalization occurs in places where a mass of people work and live in cities however for a city to achieve the title of being global it must have values and ideas that will have an impact of the rest of the world global city is a term that raises an understanding for the cognoscenti low 2005 p218 low 2005 further says that a global city is a city that is well thought out to be an important node in the world s economic system a global city has wealth power and influence to other countries as well as hosts the largest capital markets moreover a city that has wealthy multinational companies good

infrastructure better economy well educated and diverse populations and powerful organizations as well as a good political structure that are linked to the other parts of the world like nowhere else is considered to be global badcock 2002 p31 a global city therefore is the world s most important and influential city that covers the dimensions of the globalization these dimensions are cultural experience business activity human capital as well as political engagement london new york paris rome and tokyo are one of the most well known global cities as it provides global competitiveness for its citizens and companies

how some of the world s great cities have fundamentally changed since 1950

since the late 1970s the role of key world cities such as los angeles new york and london as centres of global control and co ordination has come under increasing scrutiny this book provides an overview and critique of work on the global context of metropolitan growth world city formation and the theory it has generated suggesting post imperialism as the most appropriate framework for analysis the author demonstrates the extent to which urban and regional development both in britain and elsewhere were linked to a colonial mode of production and highlights the effects of its disappearance against this background the author charts the transformation of london from imperial capital in the nineteenth and early twentieth centuries to world city in the capitalist world economy of today

the re emergence of the city from the long shadow of the state in the late twentieth century was facilitated by the state itself the unprecedeted size and scale of today s global cities and mega cities owe their conditions of possibility to a fundamental shift in the character of political order at the level of the international system this book argues that we must understand the rise of the global city as part of a wider process of the transformation of international political order and of the character of international society global cities are an

inscription of the ideals of a market society in space constructed and defended at the level of international society they embody the ascendancy of a set of liberal principles at a certain moment in history a moment related to the hegemonic status of leading states in the second half of the twentieth century and the ability of those states to shape international norms but the evolution of these urban forms has also reflected the tendency for deregulated markets to generate inequality and polarisation these features are also inscribed in the spaces of global cities global cities focus and amplify the tensions and contradictions within the contemporary international system and become key strategic sites for struggles over social justice and the character of political life in the twenty first century global cities and global order demonstrates the significance of the re emergence of cities from the long shadow of the nation state is far reaching only by examining the mechanisms by which cities have become empowered in the last few decades can we understand their new functions and capabilities in global politics

cities are gaining importance and influence worldwide they sustain the global economy set cultural trends produce greenhouse gas emissions and consume energy they attract migration flows and foster new political waves while cities were supposed to be declining back in the 1980s the globalised economy has established them as crucial world hubs leading billions of people on every continent both at the top and the bottom of the social ladder to move to cities today global cities cry out for a more prominent role but why and to what extent do they matter can they really stand alone in the global arena how are they interacting with governments and multilateral organisations from climate change to connectivity from inequalities to migration what is their contribution to key global challenges

this revised edition examines major redevelopment efforts in new york and london to uncover the forces behind these investment cycles and the role that public policy can play in moderating market instability it chronicles the progress of three development projects in

new york and three in london

innovative new research on globalization s impact on urban youth
