when hitler assumed power in 1933 he and other nazis had firm ideas on what they called a racially pure community of the people they quickly took steps against those whom they wanted to isolate deport or destroy in these essays informed by the latest research leading scholars offer rich histories of the people branded as social outsiders in nazi germany communists jews gypsies foreign workers prostitutes criminals homosexuals and the homeless unemployed and chronically ill although many works have concentrated exclusively on the relationship between jews and the third reich this collection also includes often overlooked victims of nazism while reintegrating the holocaust into its wider social context the nazis knew what attitudes and values they shared with many other germans and most of their targets were individuals and groups long regarded as outsiders nuisances or problem cases the identification the treatment and even the pace of their persecution of political opponents and social outsiders illustrated that the nazis attuned their law and order policies to german society history and traditions hitler s personal convictions nazi ideology and what he deemed to be the wishes and hopes of many people came together in deciding where it would be politically most advantageous to begin the first essay explores the political strategies used by the third reich to gain support for its ideologies and programs and each following essay concentrates on one group of outsiders together the contributions debate the motivations behind the purges for example was the persecution of jews the direct result of intense widespread anti semitism or was it part of a more encompassing and arbitrary persecution of unwanted populations that intensified with the war the collection overall offers a nuanced portrayal of german citizens showing that many supported the third reich while some tried to resist and that the war radicalized social thinking on nearly everyone s part in addition to the editors the contributors are frank bajohr omer bartov doris l bergen richard j evans henry friedlander geoffrey j giles marion a kaplan sybil h milton alan e steinweis annette f timm and nikolaus wachsmann

years before hitler unleashed the final solution to annihilate european jews he began a lesser known campaign to eradicate the mentally ill which facilitated the gassing and lethal injection of as many as 270 000 people and set a precedent for the mass

murder of civilians in confronting the good death michael bryant analyzes the u s government and west german judiciary s attempt to punish the euthanasia killers after the war the first author to address the impact of geopolitics on the courts representation of nazi euthanasia bryant argues that international power relationships wreaked havoc on the prosecutions drawing on primary sources this provocative investigation of the nazi campaign against the mentally ill and the postwar quest for justice will interest general readers and provide critical information for scholars of holocaust studies legal history and human rights support for this publication was generously provided by the eugene m kayden fund at the university of colorado

this eye opening book highlights the role of elites in constructing systems of persecution and extermination during the holocaust being highly educated or living within a certain social class doesn t prevent us from being lured into destructive systems especially when they operate to our benefit the perception that the holocaust was largely a crime carried out by ill educated thugs acting on nationalistic hysteria and xenophobic prejudice is a myth leaders from many sectors of society including industry science and religion came to support and enable the nazi government often due to the ways in which they were able to profit and benefit from the policies of persecution and genocide with both a social science and historical approach lethal elites highlights and assesses the ways in which the influence training and expertise of the most powerful and best educated were used in service to the genocidal agenda of the national socialist regime

conceived as the answer to all of mankind s seemingly insoluble health and social problems and promoted as a substitute for orthodox religious beliefs the pseudoscience of eugenics recruited disciples in many countries during the latter years of the nineteenth and early years of the twentieth centuries nowhere was this doctrine more enthusiastically endorsed than in germany where the application of eugenic theory received its most fervent support a program born of what were often contradictory opinions began under nazi rule with the compulsory sterilization of thousands of germany s citizens before morphing into the mass murder of the most vulnerable of the state s own population under the guise of so called euthanasia before ultimately escalating into a continent wide policy of extermination of those who

did not fit the nazi eugenic template the progress of this inexorable descent into barbarity was marked by successive stages of development from the practical application of euthanasia through the organization dedicated to it later on called aktion t4 and the killing centers that this institution spawned to the centrality of aktion t4 to aktion reinhardt and the holocaust important elements of the historical record can be seen to emerge how did it happen what impact has it had on contemporary society and what of the character and fate of the individuals involved in the gestation and implementation of this murderously inhumane quasi religion these deceptively simple questions require complex and often disturbing answers as shown by melvyn conroy in this important work

new essays examining the differences and commonalities between late weimar era and early nazi era german cinema against a backdrop of the crises of that time
