in her classic book the global city saskia sassen tells how new york london and tokyo became command centers of the emerging global economy and in the process underwent massive and parallel changes the book reorients the way we think about how cities shape and are shaped by globalization and provides lessons for the future

rejecting simplifying notions of globalisation as a macro economic force this book provides a grounded picture of the various ways in which people's biographies are tied up with the global cultural economy the main argument of the book is that the globalisation of lives is experienced by people as the extension of their milieux both spatially and symbolically

this book contains fifty selections from classic writings by authors such as john friedmann michael peter smith saskia sassen peter taylor manuel castells and anthony king as well as major contributions by other international scholars of global city formation

global cities all over the world are taking on new roles as they increasingly participate directly and independently in international affairs and global politics so far

surprisingly few studies have analyzed the role of the global city beyond its already well explicated role in the globalized economy how is it that local governments of global cities claim international political authority and develop what appears to be their own independent foreign and security policies despite the fact that such policy areas have traditionally been considered to be the core function of nation states and central governments what does it mean to be and to govern the contemporary global city in this book kristin ljungkvist claims that we can better understand why local governments find it to be in their global city s interest to claim international political authority by exploring how the city s role in the globalized world is constructed and narrated locally a core claim is that global city hood as a specific type of collective identity can play a constitutive part in such interest formation combining insights from international relations and urban studies scholarship and with the help of a case study on new york city ljungkvist develops a new analytical framework for studying the global city as an international political actor the global city 20 shows that even as the global city engages in various global issues such as global environmental governance or counterterrorism such pursuit will be framed and rationalized in terms of the city s economic growth the quest for growth and global competitiveness are not necessarily the only available meanings attached to the being and governing of the contemporary global city however there seems to be a remarkable persistency and attraction in economicistic ideas and an economicistic conception of the global city

global city makers provides an in depth account of the role of powerful economic actors in making and un making global cities engaging critically and constructively with global urban studies from a relational economic geography perspective the book outlines a renewed agenda for global cities research focusing on financial services management consultancy real estate commodity trading and maritime industries the detailed studies in this volume are located across the globe to incorporate major world cities such as london new york and tokyo as well as globalizing cities including mexico city hamburg and mumbai

the millennium marked a symbolic transition in the history of human settlement over half of the world s six billion people now live in towns and cities the world is an urban place this book identifies and accounts for the characteristics of the contemporary city and of urban society it analyses the distribution and growth of settlements and explores the social and behavioural characteristics of urban living the latest theoretical and empirical developments and insights are synthesized and presented in an accessible way emphasis throughout is placed upon the world scale urban developments being seen as the geographical consequences of the evolution of capitalism individual chapters focus upon populations and places growth and urbanization urban development as a global phenomenon socio economic consequences of global urban development urban culture and global urban society world cities and the urban future this second edition has been extensively updated and referenced each chapter includes sets of learning objectives annotated readings and topics for discussion

why have some cities become great global urban centers and what cities will be future leaders from athens and rome in ancient times to new york and singapore today a handful of cities have stood out as centers of global economic military or political power in the twenty first century the number of truly global cities is greater than ever before reflecting the globalization of both economic and political power in global cities a short history greg clark an internationally renowned british urbanist examines the enduring forces such as trade migration war and technology that have enabled some cities to emerge from the pack into global leadership much more than an historical review clark s book looks to the future examining the trends that are transforming cities around the world as well as the new challenges all global cities increasingly will face which cities will be the global leaders of tomorrow what are the common issues and opportunities they will face what kinds of leadership can make these cities competitive and resilient clark offers answers to these and similar questions in a book that will be of interest to anyone who lives in or is affected by the world s great urban areas

the aim of this thesis is to increase our understanding of the global city s pursuit of what can be regarded as independent foreign and security policies despite the fact that such policies have traditionally been considered to be a core function of central governments by studying how the global city s role in the globalized world is constructed in local public narratives as the local government develops and pursues specific international policies the thesis argues we can come closer to an understanding of what it means to be and to govern a global city and why its local government find it to be in the city s interest to claim international political authority a core claim is that global city hood as a specific type of collective identity can play a constitutive part in such interest formation the study seeks to make three contributions one of empirical nature and two of theoretical nature the empirical contribution involves furthering our understanding of new york city s local role conception as a global city this is also closely related to the first theoretical contribution whereby the case study of new york city as a most important case serves to develop our general understanding of what meanings are attached to contemporary global city hood from a local perspective the second theoretical contribution involves outlining a new way of studying the global city as international political actor by developing an interdisciplinary analytical framework combining insights from the global cities literature studies on urban politics and international relations respectively the analysis shows that even as the global city engages in issues such as global environmental governance or counterterrorism such pursuit will be framed and rationalized in terms of the city s economic growth the quest for growth and global competitiveness are not necessarily the only available meanings attached to the being and governing of the contemporary global city however there seems to be a remarkable persistency and attraction in economicistic ideas and an economicistic conception of the global city

essay from the year 2012 in the subject sociology habitation and urban sociology grade b monash university south africa campus course international studies language english abstract nowadays globalization occurs in places where a mass of people work and live in cities however for a city to achieve the title of being global it must have values and ideas that will have an impact of the rest of the world global city is a term that raises an understanding for the cognoscenti low 2005 p218 low 2005 further says that a global city is a city that is well thought out to be an important node in the world s economic system a global city has wealth power and influence to other countries as well as hosts the largest capital markets moreover a city that has wealthy multinational companies good infrastructure better economy well educated and diverse populations and powerful organizations as well as a good political structure that are linked to the other parts of the world like nowhere else is considered to be global badcock 2002 p31 a global city therefore is the world s most important and influential city that covers the dimensions of the globalization these dimensions are cultural experience business activity human capital as well as political engagement london new york paris rome and tokyo are one of the most well known global cities as it provides global competitiveness for its citizens and companies

the re emergence of the city from the long shadow of the state in the late twentieth century was facilitated by the state itself the unprecedented size and scale of today s global cities and mega cities owe their conditions of possibility to a fundamental shift in the character of political order at the level of the international system this book argues that we must understand the rise of the global city as part of a wider process of the transformation of international political order and of the character of international society global cities are an inscription of the ideals of a market society in space constructed and defended at the level of international society they embody the ascendance of a set of liberal principles at a certain moment in history a moment related to the hegemonic status of leading states in the second half of the twentieth century and the ability of those states to shape international norms but the evolution of these urban forms has also reflected the tendency for deregulated markets to generate inequality and polarisation these features are also inscribed in the spaces of global cities global cities focus and amplify the tensions and contradictions within the contemporary international system and become key strategic sites for struggles over social justice and the character of political life in the twenty first century global cities and global order demonstrates the significance of the re emergence of cities from the long shadow of the nation state is far reaching only by examining the mechanisms by which cities have become empowered in the last few decades can we understand their new functions and capabilities in global politics

cities are gaining importance and influence worldwide they sustain the global economy set cultural trends produce greenhouse gas emissions and consume energy

they attract migration flows and foster new political waves while cities were supposed to be declining back in the 1980s the globalised economy has established them as crucial world hubs leading billions of people on every continent both at the top and the bottom of the social ladder to move to cities today global cities cry out for a more prominent role but why and to what extent do they matter can they really stand alone in the global arena how are they interacting with governments and multilateral organisations from climate change to connectivity from inequalities to migration what is their contribution to key global challenges
