the book is about the universal phenomenon of citymaking seen in a historical perspective how and why cities took the shape they did it focuses on a number of themes organic patterns the grid the city as a diagram the grand manner and the skyline

and moves through time and place to interpret the hidden order inscribed in urban patterns

kostof follows the city shaped with a brilliant study of the component parts that make up urban life all cities consist of certain basic elements streets parks public places and boundaries and it is to these day to day pieces of urban experience that this book turns providing a fascinating understanding of walls fortifications placement of green space and the fringe areas where city and country meet illustrations

this volume brings together a team of leading specialists to examine the policies of image and city marketing which have developed over the past 15 years and whether these are a continuity of earlier strategies

spiro kostof the renowned architectural historian and chronicler of urban form presents a universal history of the elements of cities streets public places urban divisions and the borders of city and countryside this is both an independent study and a companion volume to professor kostof s book the city shaped which dealt with cities as complete entities now he follows the evolution of their components and traces the story right up to the present showing how the issues remain fresh and engage with our own day often in unexpected ways he also discusses urban process the effect on cities of natural disasters such as the great fire of london and the lisbon earthquake war and comprehensive redevelopment compared with traditional patterns of incremental growth and change this is at once an exercise in architectural and social history a case study for the present and a pointer for the future

well written and extremely topical deciphering the city efficiently deals with the large and small issues facing cities today a focus on globalization s impact on the role of cities an explicit mission to drive home the applied nature of urban studies to students this innovative text offers an exciting introduction to the history issues problems potential solutions and challenges facing cities in the developed and the developing world for the twenty first century globalization has changed the roles of cities in the global economy and this text begins with an introduction to the phenomenon of globalization and how the changes it has brought about have affected the social political and economic institutions of societies the second section of the text concentrates on the psychology of the city and the community building process while the book s third section

illustrates the structure of cities and their historical and emerging patterns deciphering the city makes studying the city a relevant and interesting subject necessary in understanding the functioning of today's world

an accomplished architect and urbanist goes back to the roots of what makes cities attractive and livable demonstrating how we can restore function and beauty to our urban spaces for the long term nearly everything we treasure in the world's most beautiful cities was built over a century ago cities like prague paris and lisbon draw millions of visitors from around the world because of their exquisite architecture walkable neighborhoods and human scale yet a great deal of the knowledge and practice behind successful city planning has been abandoned over the last hundred years not because of traffic growth or other practical hurdles but because of ill considered theories emerging from modernism and reactions to it the errors of urban design over the last century are too great not to question the solutions being offered today walkability smart and green technologies hint at what has been lost and what may be regained but they remain piecemeal and superficial in the art of classic planning architect and planner nir haim buras documents and extends the time tested and holistic practices that held sway before the reign of modernism with hundreds of full color illustrations and photographs that will captivate architects planners administrators and developers the art of classic planning restores and revitalizes the foundations of urban planning inspired by venerable cities like kyoto vienna and venice and by the great successes of lecorbusier's washington haussmann's paris and burnham's chicago buras combines theory and a host of examples to arrive at clear guidelines for best practices in classic planning for today's world the art of classic planning celebrates principles of urban design and invites us to return to building beautiful cities

in what cities say emily talen provides a wide ranging yet concise synthesis of the fundamental drivers of built form its social and cultural meaning and how we should interpret it including thirty five distinct city patterns and forms talen develops a language of interpretation to understand the motive and meaning behind the city and its elements by exposing these meanings talen asserts that we will be in a stronger position to articulate and argue for the kinds of cities we want

an expertly woven history and critique of the ideas shaping transportation in the united states excruciating traffic jams struggling transit agencies an epidemic of pedestrian fatalities it is clear that transportation is not working in the united states

and that we need to rethink our approach in shifting gears susan handy provides an in depth history of the ideas embedded in american transportation policy and the emergence of new ways of thinking that could give us better transportation options weaving in bits of her own personal narrative handy gives readers a deeper and clearer understanding of our transportation system and the roots of its successes and failures handy covers the myriad costs of car ownership the futility of expanding highways and the misplaced faith in technological innovation she offers new ideas and strategies that can improve the health of our car centric transportation system most crucially the idea that communities across the country must create an array of choices for daily travel shifting gears asserts that a diverse transportation ecosystem is essential for creating more just sustainable communities but getting there will take a dramatic shift in how we think about transportation

of all the elements of a neighborhood the pattern of streets and their infrastructure is the most enduring given the 20th century s additions to the range of transportation means trains subways buses trucks bicycles motorbikes and cars all vying for space and effectiveness a fresh look at the streets is warranted this book contributes a new system of neighborhood design with a focus on contemporary planning priorities drawing lessons from historic and current development it proposes a new pattern more fitting for modern culture addressing such issues as walkability mobility health safety security cost and greenhouse gas emissions case studies of national and international neighborhoods and districts based on the new network model demonstrate its application in real world situations instructors considering this book for use in a course may request an examination copy [here](#)
