examination of the universal phenomenon of the city from a historical perspective considering how and why cities took the shape they did

kostof follows the city shaped with a brilliant study of the component parts that make up urban life all cities consist of certain basic elements streets parks public places and boundaries and it is to these day to day pieces of urban experience that this book turns providing a fascinating understanding of walls fortifications placement of green space and the fringe areas where city and country meet illustrations

this book offers a comprehensive introduction to urban design from a historical overview and basic principles to practical design concepts and strategies it discusses

the demographic environmental economic and social issues that influence the decision making and implementation processes of urban design the second edition has been fully revised to include thorough coverage of sustainability issues and to integrate new case studies into the core concepts discussed

for those who have ever wondered why we have trees in cities or what makes the layout of cities like paris and amsterdam seem so memorable city trees a historical geography from the renaissance through the nineteenth century by henry w lawrence provides a comprehensive and handsome guide to the history of trees in urban landscapes covering four centuries of development in the cities of europe and america this book shows how trees became integral to urban landscapes by looking at the historical evolution of the spaces in which they were planted and how these spaces were used reflecting on the impact trees have had on what many consider to be the fundamental aspects of city life people buildings social and economic activity lawrence draws on graphic materials written descriptions local histories and archival research to provide a unique look at the tree s role in urban landscape history primarily concerned with aesthetics power and national traditions lawrence reflects on the differing impacts city trees have had on multiple aspects of culture from their roles as symbols and their representation of economic prosperity to the differing ways nations planted their trees which gradually blended into an international style of urban planting complete with fascinating illustrations city trees will appeal to those interested in urban history and geography as well as the general public interested in cities cultural history and landscape design

spiro kostof the renowned architectural historian and chronicler of urban form presents a universal history of the elements of cities streets public places urban divisions and the borders of city and countryside this is both an independent study and a companion volume to professor kostof s book the city shaped which dealt with cities as complete entities now he follows the evolution of their components and traces the story right up to the present showing how the issues remain fresh and engage with our own day often in unexpected ways he also discusses urban process the effect on cities of natural disasters such as the great fire of london and the lisbon earthquake war and comprehensive redevelopment compared with traditional patterns of incremental growth and change this is at once an exercise in architectural and social history a case study for the present and a pointer for the future

offers a new original way of framing questions about knowledge knowledge and civilization advances detailed criticism of philosophy s usual approach to knowledge and describes a redirection away from textbook problems of epistemology toward an ecological philosophy of technology and civilization rejecting theories that confine knowledge to language or discourse allen situates knowledge in the greater field of artifacts technical performance and human evolution his wide ranging considerations

draw on ideas from evolutionary biology archaeology anthropology and the history of cities art and technology

this book about walls is genuinely exciting and alive with insights elegance rigor style and thoughtful humanism it reveals and interrogates the social political and historical complexities of one of our most common landscape features demonstrating how we misconstrue or fail to appreciate the nature and possibilities of physical boundaries oles shows that our societies and our politics are shaped by the nature and quality of the divisions we make on and among landscapes and he interrogates practical theoretical and ethical aspects of our landscapes and the boundaries between them this leads him into stark discussions of barriers such as the usmexico border fence israel s fortifications in the west bank and the kinds of residential barriers that define neighborhoods by their edges in communities worldwide from johannesburg to levittown oles further locates counternarratives of walls showing how people have lived in walls or used them in seemingly contradictory ways letting permeability become a form of strength

ancient cities have much to tell us about the social political religious and economic conditions of their times and also about our own ongoing excavations all over the world are enabling scholars to document intra city changes through time city to city interaction and changing relations between cities and their hinterlands as the essays in this volume reveal archaeologists now know much more about the founding and functions of ancient cities their diverse trade networks their heterogeneous plans and layouts and their various lifespans and trajectories jacket
