this book discusses how people go about achieving their social goals through human symbolic interaction the editors collective presumption is that there are more or less typical ways that people attempt to obtain desired outcomes be they persuasive informative conflictive or the like through communication representing a first summary of research done by scholars primarily in the communication discipline this volume seeks to identify and understand how it is that people achieve what they want through social interaction under the very broad label of strategies this research has sought to identify critical social goals such as gaining

compliance generating affinity resolving social conflict and offering information specify for each goal the ways or strategies by which people can go about achieving these goals determine predictors of strategy selection that is why does a person opt for one strategy over others to obtain the desired end the research also reflects the attention the field of communication has given to strategy issues in the past 15 years the chapters describe research on the ways in which people achieve different goals and summarize existing research and theory on the attainment of social goals readers will gain insight into many of the issues that exist regardless of the strategy being discussed thus this volume may not include chapters on topics such as ways people elicit or offer disclosure ways people demonstrate anger or ways people create guilt but the issues that appear consistently throughout the various chapters should apply equally to these finally the essays in this volume provide not only a summary of what has been accomplished to date but also an initial theoretic map for future research concerning strategic interpersonal communication

this outstanding volume provides an up to date overview of the advances in our knowledge of harmful cyanobacteria an essential reference for all scientists and environmental professionals interested in cyanobacterial ecology and water management
