roland allen is internationally renowned for his controversial solutions to dilemmas within churches and missions his works were first written in the first decade of the twentieth century yet their ideas are so radical that they are still relevant today indeed allen predicted that his principles would not be broadly accepted until around fifty years after their creation this selection of works by this mission pioneer and creative thinker takes extracts from allen's other writings which although having potential to be just as influential as those better known have long been out of print it is now the present day reader's chance to investigate the theories within texts such as pentecost and the world non professional missionaries mission activities considered in relation to the manifestation of the spirit st paul and the judaizers a dialogue an illustration from v s azariah the case for voluntary clergy and to the parishioners of chalfont st peter throughout all of these writings is allen's central belief that the holy spirit is

in the church everywhere this selection of texts makes an ideal accompaniment to allen s significant works on missionary methods and principles including missionary methods st paul s or ours missionary principles the spontaneous expansion of the church all of which have been reprinted by the litterworth press

if it were once believed that the freedom of churches should be restricted to bring greater control to missions roland allen sets out to overturn this conception warning against the danger of imposing greater limits on churches the author advocates that all members of the church natives and foreigners alike must take an active role in its establishment and daily life the study divides itself into nine chapters the first introducing allen s standpoint the second as an opening into thenature and character of spontaneous expression the third chapter deals with modern attempts by natives towards the liberty of their churches the fear of the doctrine becoming weakened by natives taking it into their own hands is addressed by chapter four and this fear is widened into the realm of the christian standard of morals in chapter five civilisation and enlightenment form the central themes of the sixth chapter chapters seven and eight tackle the distinction between the church andmissionary societies it is in the final chapter that the future of spontaneous expansion is investigated and allen puts forward his ideas which as he rightly predicted were broadly accepted fifty years and longer still after their original publication

no one was more radically critical of the ministry and the inherited church policy that surrounds it than roland allen 1868 1949 whose prophetic writings constantly challenge the whole mission of the christian church and many of his most important essays are collected here along with contributions about him after studying at oxford his clerical training was in leeds he went as a missionary to china for the society for the propagation of the gospel spg where he stayed for twenty years his experience convinced him that missionary methods needed changing and that st paul had more to offer than contemporary practice and in particular that ministry should be centred in the laity these ideas unpopular at the time have grown in importance and roland allen s influence is now greater than at any time in this volume paton with the co operation of grubb and king has written on the central concerns of allen s life and how his witness gave rise to many fruitful enterprises in different parts of the world many new writings of allen s are included in the volume and grubb tells the story of the survey application trust which for over half a century played a formative and pioneering part in the mission of the church this title adds a lot of new information and throws fresh light on the modern history of many christian enterprises and extends current debate over the role of the laity

first published in 1913 missionary principles is a classic textbook by genre but in its controversial evaluation of the church s missionary theories it is by no means wholly traditional at the centre of this discursive study allen asserts the distinction which

needs to be made in missionary aims between the extension of the church and the preaching of jesus christ the book is divided into four major chapters entitled the impulse the hope the means and the reaction the impulse hope and means of missionary work can all be embodied by jesus christ who is viewed as the source the end and the worker it is always with this objective in mind that allen guides the reader through christ s wishes as to how the word should be spread in the final chapter allen examines the results of believing in the holy spirit s inspiration and the effects this has on the missionary s understanding of moral purpose and motive of missions both at home and overseas it is not the same thing to seek the manifestation of christ in the growth of the church and the effect of that upon all missionary work is most profound extract from chapter two
