Office of the Assistant Secretary of Defense (Installations and Logistics) United States. Department of Defense

the scope of this sae recommended practice is limited to gasoline fuel pumps used in automotive direct fuel injection systems it is primarily restricted to bench tests this sae recommended practice also defines the minimum design verification testing that is recommended to verify the suitability of gasoline direct injection gdi high pressure fuel pumps used for pumping gasoline or gasoline blend fuels to direct injection gasoline injectors additional tests not specified in sae j2714 will be required for non automotive pump applications or pumps such as those intended for use on aircraft motorcycles or marine equipment the pump and the gasoline direct injector are complementary components and the direct injector component is fully described in sae j2713 which provides a full range of test procedures for the characterization of such injectors except where specifically stated otherwise test results are recorded for individual parts under recommended test conditions where population characteristics are reported the sample size selection method and statistical analysis technique shall be explicitly stated the continued use of direct injection systems in gasoline internal combustion engines along with the use of direct injection pumps in those systems requires a document that provides for standardized testing performance evaluation and characterization of such pumps the sae recommended practice is updated to reflect current best practices in test procedures and latest use conditions in industry

the familiar yellow technical instruction series from bosch have long proved one of their most popular instructional aids they provide a clear and concise overview of the theory of operation component design model variations and technical terminology for the entire bosch product line and give a solid foundation for better diagnostics and servicing clearly written and illustrated with photos diagrams and charts these books are equally at home in the vocational classroom apprentices toolkit or enthusiasts fireside chair if you own a car especially a european one you have bosch components and systems covers injection pump designs governor designs workshop technology

this text is well established as one of the most authoritative textbooks in the truck and bus industry having been read by many students and adopted by college lecturers at home overseas

significantly updated to cover the latest technological developments and include latest techniques and practices

this reference book provides a comprehensive insight into todays diesel injection systems and electronic control it focusses on minimizing emissions and exhaust gas treatment innovations by bosch in the field of diesel injection technology have made a significant contribution to the diesel boom calls for lower fuel consumption reduced exhaust gas emissions and quiet engines are making greater demands on the engine and fuel injection systems
