what happens to us as we die discover the answers in this exclusive 25th anniversary edition of sherwin b nuland s seminal book with a foreword by paul kalanithi bestselling author of when breath becomes air there are many books intended to help people deal with the trauma of bereavement but few which explore the reality of death itself sherwin b nuland with over thirty years experience as a surgeon explains in detail the processes which take place in the body and strips away many illusions about death the result is a unique and compelling book addressing the one final fact that all of us must confront i don t know of any writer or scientist who has shown us the face of death as clearly honestly and compassionately as sherwin nuland does here james gleick

author of chaos

important and provocative the undead examines why even with the tools of advanced technology what we think of as life and death consciousness and nonconsciousness is not exactly clear and how this problem has been further complicated by the business of organ harvesting dick teresi a science writer with a dark sense of humor manages to make this story entertaining informative and accessible as he shows how death determination has become more complicated than ever teresi introduces us to brain death experts hospice workers undertakers coma specialists and those who have recovered from coma organ transplant surgeons and organ procurers anesthesiologists who study pain in legally dead patients doctors who have saved living patients from organ harvests nurses who care for beating heart cadavers icu doctors who feel subtly pressured to declare patients dead rather than save them and many others much of what they have to say is shocking teresi also provides a brief history of how death has been determined from the times of the ancient egyptians and the incas through the twenty first century and he draws on the writings and theories of celebrated scientists doctors and researchers jacques bénigne winslow sherwin nuland harvey cushing and lynn margulis among others to reveal how theories about dying and death have changed with the undead teresi makes us think twice about how the medical community decides when someone is dead

in this groundbreaking new volume computer researchers discuss the development of technologies and specific systems that can interpret data with respect to domain knowledge although the chapters each illuminate different aspects of image interpretation all utilize a common approach one that asserts such interpretation must involve perceptual learning in terms of automated knowledge acquisition and application as well as feedback and consistency checks between encoding feature extraction and the known knowledge structures in a given application domain the text is profusely illustrated with numerous figures and tables to reinforce the concepts discussed
