this book provides in depth results and case studies in innovation from actual work undertaken in collaboration with industry partners in architecture engineering and construction aec scientific advances and innovative technologies in the sector are key to shaping the changes emerging as a result of industry 4 0 mainstream building information management bim is seen as a vehicle for addressing issues such as industry fragmentation value driven solutions decision making client engagement and design process flow however advanced simulation computer vision internet of things iot blockchain machine learning deep learning and linked data all provide immense opportunities for dealing with these challenges and can provide evidenced based innovative solutions not seen before these technologies are perceived as the true enablers of future practice but only recently has the aec sector recognised terms such as golden key and golden thread as part of bim processes and workflows this book builds on the success of a number of initiatives and projects by the authors which include seminal findings from the literature research and development and practice based solutions produced for industry it presents these findings through real projects and case studies developed by the authors and reports on how these technologies made a real world impact the chapters and cases in the book are developed around these overarching themes bim and aec design and

optimisation application of artificial intelligence in design bim and xr as advanced visualisation and simulation tools design informatics and advancements in bim authoring green building assessment emerging design support tools computer vision and image processing for expediting project management and operations blockchain big data and iot for facilitated project management bim strategies and leveraged solutions this book is a timely and relevant synthesis of a number of cogent subjects underpinning the paradigm shift needed for the aec industry and is essential reading for all involved in the sector it is particularly suited for use in masters level programs in architecture engineering and construction

this book showcases some of the research that was presented at the rtcsd 2023 the 3rd international conference on recent trends in environment and sustainable development with topics that explore important global issues this book covers cutting edge research and creative solutions in four key areas nanomaterials in biological applications renewable energy agrifood and sustainability discussions about environment protection cover a wide range of topics including how to manage environment resources sustainably how to improve governance and the effects of climate change chapters on energy production urban and industrial systems governance issues and the crucial shift towards circular economies are all included in the section on energy the agrifood domain looks into innovative food processing techniques the impact of climate change on food production and sustainable agricultural practises as a final note the sustainability segment covers a wide range of subjects including the sustainability of the bioeconomy cyber physical systems the effects of climate change and resource efficiency supporting the urgent need for a comprehensive strategy for achieving global sustainability

the volume contains 46 papers presented at the seventh symposium in tokyo they represent the most recent research activity in japan russia ukraine lithuania georgia and some other countries on diverse topics of the traditionally strong fields in these countries probability theory and mathematical statistics

based on a conference this book is intended to promote a better understanding of the effects of adjuvants on pesticide penetration translocation photodegradation and stability spray deposition and dissipation and the fate of herbicides in the environment

plant hormones have pivotal roles in the regulation of plant growth development and reproduction their signaling pathways are interconnected in a complex network which provides plants with an enormous regulatory potential to rapidly adapt to their environment and to utilize

their limited resources for growth and survival in a cost efficient manner auxin is a hormone molecule whose activity levels are most important for its regulatory roles during plant cell organ and tissue development therefore the precise regulation of auxin levels is an essential mechanism to fine tune the activity of this powerful hormone during plant growth and development likewise cytokinins exhibit a wide range of physiological functions including regulation of shoot and root apical meristems stimulation of branching vascular development chloroplast differentiation stabilization of the structure and function of the photosynthetic machinery delay of senescence stomata opening and elevation of the sink strength and nutritional signaling moreover gibberellins also regulate many aspects of plant growth and development including seed germination stem elongation leaf expansion and flower and fruit development the broad implication of gibberellins in plant development is strictly associated with tight regulation of their metabolism by multiple environmental and endogenous factors ranging from light and temperature to other hormones including feedback control understanding the significant roles of these phytohormones in plant biology the current subject has attracted the attention of scientists from across the globe this comprehensive volume auxins cytokinins and gibberellins signaling in plants highlights the various prospects involved in the current scenario the book comprises the chapters from diverse areas dealing with biotechnology molecular biology proteomics genomics metabolomics etc

with global harmonization of regulatory requirements and quality standards and national and global business consolidations ongoing at a fast pace pharmaceutical manufacturers suppliers contractors and distributors are impacted by continual change offering a wide assortment of policy and guidance document references and interpretations this sixth edition is significantly expanded to reflect the increase of information and changing practices in cGMP regulation and pharmaceutical manufacturing and control practices worldwide an essential companion for every pharmaceutical professional this guide is updated and expanded by a team of industry experts each member with extensive experience in industry or academic settings

containing the transactions of the various sections together with abstracts of papers published in other journals etc
