this book explores a wide range of topics relating to scientific and religious learning in the work of bishop robert grosseteste c 1168 1253 and does so from various perspectives including those of a twenty first century scientists historians and philosophers as well as several medievalists in particular it aims to contribute to our understanding of where to place grosseteste in the history of science against the background of the famous claim by a c crombie that grosseteste introduced what we now might call experimental science and to demonstrate that the polymathic world of the medieval scholar who recognized no dichotomy in the pursuit of scientific and philosophical theological understanding has much to teach those of us in the modern world who wrestle with the vexed question of the relationship between science and religion the book comprises an edited selection of the best papers

presented at the 3rd international robert grosseteste conference 2014 on the theme of scientific and religious learning especially in the work of grosseteste

this anthology brings together a generous selection of scientific and literary material to explore the exchanges and interactions between them it shows how scientists and creative writers alike fed from a common imagination in their language style metaphors and imagery it includes writing by michael faraday thomas carlyle thomas hardy charles babbage charles darwin louis pasteur edgar allan poe mark twain and many others

this title was first published in 2002 this text seeks to provide the necessary background for understanding the contemporary relationship between islam and modern science presenting an authentic discourse on the islamic understanding of the physical cosmos muzaffar iqbal explores god s relationship to the created world and the historical and cultural forces that have shaped and defined muslim attitudes towards science what was islamic in the islamic scientific tradition how was it rooted in the qur anic worldview and whatever happened to it these are some of the facets of this account of a tradition that spans eight centuries and covers a vast geographical region written from within this ground breaking exploration of some of the most fundamental questions in the islam and science discourse explores the process of appropriation and transformation of the islamic scientific tradition in europe during the three centuries leading up to the scientific revolution

the scientific method is just over a hundred years old from debates about the evolution of the human mind to the rise of instrumental reasoning henry m cowles shows how the idea of a single scientific method emerged from a turn inward by psychologists that produced powerful epistemological and historical effects that are still with us today

each entry provides the name degrees earned city of residence profession and death date if applicable for some entries a street address is provided

each day will bring to your recall some person or event in the world of religion or philosophy as well as one from the field of science little by little you will become aware of the rich heritage of the human family and all these are only samples from the treasure house of religion and science

magic mystery and science presents the occult as a third stream of belief as important to the shaping of western civilization as greek rationalism or judeo christianity the occult seeks explanations in a world that is living and intelligent quite unlike the one supposed by science by taking these beliefs seriously while keeping an eye on science this book aims to capture some of the power of the occult readers will discover that the occult has a long history that reaches back to babylonia and ancient egypt it proceeds alongside and frequently mingles with religion and science from the egyptian book of the dead to new age beliefs from plato to adolf hitler occult ways of knowing have been used to explain a world that still tempts us with the knowledge of its dark secrets from publisher s description
