the focus of this volume lies on singularity theory in algebraic geometry it includes papers documenting recent and original developments and methods in subjects such as resolution of singularities d module theory singularities of maps and geometry of curves the papers originate from the third international conference on algebraic geometry held in la rbida spain in december 1991 since then the articles have undergone a meticulous process of refereeing and improvement and they have been organized into a comprehensive account of the state of the art in this field

this book contains two of the three lectures given at the saint flour summer school of probability theory during the period august 18 to september 4 1993

this volume features a critical edition of the recently rediscovered manuscripts written by the french philosopher louis couturat 1868 1914 it includes the transcriptions of three of his believed to be lost manuscripts first the cours de caen 1898 99 on various systems of

symbolic logic second his lecture at the collège de france histoire de la logique formelle moderne and third his textbook on mathematical logic the manuscripts document the early reception of mathematical logic in france and provide insights into the first introduction of the french reader to the work of gottlob frege and bertrand russell it is the aim of the editors of this volume to contribute to the history of symbolic logic particularly the history of its dissemination and its teaching in france at the same time the volume contributes to an alternative history and conception of philosophy in which semiotics and concrete mathematical practice stand in focus the book is interesting for students and researchers in the history of philosophy mathematics and logic
