nursing research and evidenced based practice offers a unique approach to learning about nursing research and in particular evidence based nursing practice it is ideal for nursing students and practicing nurses who need to understand the language of research and the significance of research to their practice as well as integrate research and evidence based practice into their own practices this innovative text provides a step by step guide on how to develop evidence based practice proposals for the real world and focuses on analyzing all forms of evidence with chapter objectives tables

evidence based practice in nursing healthcare a guide to best practice 5th edition is a bestselling easy to use guide to translating research findings to nursing practice and applying practice data for superior clinical decision making using conversational writing inspiring quotes and an enhanced case based approach ajn award winning authors bernadette melnyk and ellen fineout overholt demystify evidence based practice to help students deliver optimal patient care and become better nurses

nurses are faced with unprecedented challenges and opportunities healthcare delivery models are transforming that require adaptive and flexible nurses the primary role of the frontline nurse is providing patient care to be successful in

this role it requires numerous competencies supported by evidence based data frontline bedside nurses are fundamental to the success of value based care delivery models these transformational models rely on robust nursing contributions for success most frontline nurses don t understand value based care models and their role in promoting positive outcomes for reimbursement this issue is a tool kit to empower our frontline nurses for challenges they are facing with transformations occurring at their bedside practice site the articles will be a best practice handbook for frontline nurses by providing resources to develop clinical skills to provide safe quality and accountable patient care needed for new healthcare delivery models

this issue of clinics in geriatric medicine guest edited by dr steven castle is devoted to falls prevention articles in this important issue include key components of exercise programs in community to prevent falls potential reasons deaths from falls in older adults have doubled in the past decade link between primary care and community based balance exercise programs role of foot orthoses and shoe insoles at improving mobility and balance blood pressure control and falls risk optimizing function and physical activity in hospitalized older adults to prevent functional decline and falls delirium as it relates to falls virtual sitters redesigning a fall prevention program in acute care building on evidence and nursing unit design and hospital falls

despite sustained debate and progress the evolving thing that is evidence based nursing or practice ebp continues to dangle a variety of conceptual and practical loose threads moreover when we think about what is being asked of students and registered or licenced practitioners in terms of ebp it is difficult not to concede that this ask is in many instances quite large and occasionally it may be unachievable ebp has and continues to improve patient client and user care yet significant questions concerning its most basic elements remain unresolved and if nurses are to contribute to the resolution or reconfiguration of these questions then as a first step we must acknowledge their existence from a range of international standpoints and perspectives contributors to this book focus on aspects of ebp that require development this focus is always robust and at times it is unashamedly provocative contributors challenge readers to engage with anomalies that surround the subject and readers are asked to consider the often precarious assumptions that underpin key aspects of ebp while both conflict and concord are evident among the various offerings presented here the book nonetheless creates and sustains a narrative that is bigger or more substantial than the sum of individual

parts and across contributions a self assuredly critical stance towards ebp as currently practiced conceptualized and taught coexists alongside respectful admiration for all who make it happen exploring evidence based practice debates and challenges in nursing should be considered essential reading for academics and postgraduate students with an interest in evidence based practice and nursing research

here susan l norwood presents a fresh nursing research textbook which provides an engaging and user friendly introduction to this important subject area with valuable information for nursing students the book helps nurses acquire essential skills for today s dynamic health care environment

includes proceedings of the association papers read at the annual sessions and list of current medical literature
