are judges decisions more likely to be based on personal inclinations or legal authority the answer eileen braman argues is both law politics and perception brings cognitive psychology to bear on the question of the relative importance of norms of legal reasoning versus decision makers policy preferences in legal decision making while braman acknowledges that decision makers attitudes or more precisely their preference for policy outcomes can play a significant role in judicial decisions she also believes that decision makers belief that they must abide by accepted rules of legal analysis significantly limits the role of preferences in their judgements to reconcile these competing factors braman posits that judges engage in motivated reasoning a biased process in which decision makers are unconsciously predisposed to find legal authority that is consistent with their own preferences more convincing than those that go against them but braman also provides evidence that the scope of motivated reasoning is limited objective case facts and accepted norms of legal reasoning can often inhibit decision makers ability to reach conclusions consistent with their preferences

this volume derives from a series of lectures delivered as the general course at the hague academy of international law in july 1989 like those lectures this volume does not pretend to provide a complete treatise covering all international law rather it offers a particular perspective on the principal subjects of traditional international law elaborates new developments and dares reexamine assumptions and premises the book is built on three themes the first addresses law as politics and international law as the law of a political system now comprised of more than 180 separate independent states the essential autonomy of states accounts for the political as well as economic and cultural heterogeneity in a pluralist and fragmented system and international law as its common denominator of normative expression a second theme explores change in international law as reflecting change in the values and purposes of the international political system it traces the pursuit through law of the traditional ideal of the state system to secure every state s right to realize its own agenda through its own institutions and the superimposed contemporary purpose to promote individual human rights and welfare in every society the third theme perceives a movement in the law from conceptualism to functionalism from logical deduction out of abstract principles to pragmatic attention to practical needs and solutions to new and old human problems each of these themes dominates in several chapters but the other themes are not absent from any of them each will add a fresh perspective and contribute to understanding the nature and operation of international law in the international political system at the turn of a new century

the past two decades have seen an outpouring of work in legal theory that is self consciously critical of aspects of american law and the institutions of the liberal state in this lively volume eminent scholars in philosophy law and political science respond to this recent scholarship by exploring what constitutes a radical critique of the law examining such theories as critical legal studies feminist theory and theories of difference and critical race theory the authors consider whether the critiques advanced in recent legal theory can truly be called radical and what form a radical critique of american law should take writing at the cutting edge of the critique of critical legal theory they offer insights first on critical legal scholarship then on feminist political and legal theory a third group of contributions questions the radicalness of these approaches in light of their failure to challenge fundamental aspects of liberalism while a final section focuses on current issues of legal reform

through critical views on criminal punishment including observations on rape and hate speech each major essay describes the underlying principles in the development of a radical legal theory and addresses unresolved questions relating to it while accompanying commentaries present conflicting views the resulting dialogue explores wide ranging issues like equity value relativism adversarial and empathic legal advocacy communitarianism and the social contract impartiality and contingency natural law and corrective justice a common thread for many of the articles is a focus on the social dimension of society and law which finds the individualism of prevailing liberal theories too limiting radical critiques of the law is particularly unique in presenting critical and feminist approaches in one volume along with skeptical commentary about just how radical some critiques really are proposing alternative critiques that embody considerably greater promise of being truly radical it offers provocative reading for both philosophers and legal scholars by showing that many claims to radicalism are highly problematic at best
