recent news events related to quality in global supply chains have called attention to the need for more research on supply chains that operate in a global context indeed it would be difficult to find a supply chain that does not cut across national boundaries at some point the presence of global supply chains introduces a number of new management challenges managing global supply chain relationships operations strategies and practices focuses on issues related to relationships among members of global supply chains this comprehensive work addresses three important aspects of global supply chain relationships supply chain integration and collaboration outsourcing and offshoring of production and recent growth in supplier networks

it has been said that every generation of historians seeks to rewrite what a previous generation had established as the standard interpretations of the motives and circumstances shaping the fabric of historical events it is not that the facts of history have changed no one will dispute that the battle of waterloo occurred on june 11 1815 or that the allied invasion of europe began on june 6 1944 what each new age of historians are attempting to do is to reinterpret the motives of men and the force of circumstance impacting the direction of past events based on the factual social intellectual and cultural milieu of their own generation by examining the facts of history from a new perspective today s historians hope to reveal some new truth that will not only illuminate the course of history but also validate contemporary values and societal ideals although it is true that tackling the task of developing a new text on logistics and distribution channel management focuses less on schools of philosophical and social analysis and more on the calculus of managing sales campaigns inventory replenishment and income statements the goal of the management scientist like the historian is to merge the facts and figures of the discipline with today s organizational cultural and economic realities hopefully the result will be a new synthesis where a whole new perspective will break forth exposing new directions and opportunities
