for the fifth time in its history in cooperation with Springer Verlag the European Conference on Object Oriented Programming (ECOOP) conference series is glad to offer the object oriented research community the ECOOP 2001 workshop reader a compendium of workshop reports panel transcripts and poster abstracts pertaining to the ECOOP 2001 conference held in Budapest from 18 to 22 June 2001. ECOOP 2001 hosted 19 high quality workshops covering a large spectrum of research topics. The workshops attracted 460 participants on the first two days of the conference. Originally 22 workshops were chosen from 26 proposals by a workshop selection committee following a peer review process. Due to the overlaps in the areas of interest and the suggestions made by the committee six of the groups decided to merge their topics into three workshops. This book contains information on the panel poster session and 17 workshop reports for which we have to thank our workshop organizers who did a great job in preparing and formatting them. The reports are organized around the main line of discussion comparing the various approaches and giving a summary on the debates. They also include the list of participants affiliations contact information and the list of contributed position papers. Although they usually do not include abstracts or excerpts of the position papers they do give useful references to other publications and websites where more information may be found.

We live in a wired society with computers containing and passing around vital information on both personal and public matters. Keeping this data safe is of paramount concern to all. Yet not a day seems able to pass without some new threat to our computers. Unfortunately the march of technology has given us the benefits of computers and electronic tools while also opening us to unforeseen dangers. Identity theft, electronic spying and the like are now standard worries. In the effort to defend both personal privacy and crucial databases computer security has become a key industry. A vast array of companies devoted to defending computers from hackers and viruses have cropped up. Research and academic institutions devote a considerable amount of time and effort to the study of information systems and computer security. Anyone with access to a computer needs to be aware of the developing trends and growth of computer security. To that end this book presents a comprehensive and carefully selected bibliography of the literature most relevant to understanding computer security. Following the bibliography section continued access is provided via author title and subject indexes. With such a format this book serves as an important guide and reference tool in the defence of our computerised culture.
