jungle tells a deep new history of the world arguing that tropical rainforests played an outsize and overlooked role in our lives although we now recognize the crucial role tropical forests play in regulating planetary systems like the atmosphere we still tend to think of them as a kind of green hell as inhospitable prehistoric wildernesses largely irrelevant to our lives this has made it easier for private interests to exploit rainforest resources but it also influences environment policy we treat rainforests as either raw commodities or as landscapes that are unfit for human life and should be left alone but in recent years new developments in archaeology and anthropology have cast doubt on this narrative patrick roberts is one of the leaders of this growing area of research and in jungle he reveals mounting evidence that the rainforests have always been intimately connected to life on earth they made the planet habitable for the first land animals oversaw the rise and fall of the dinosaurs disseminated the first flowering plants around the globe and played host to the emergence and development of human societies this last point is especially provocative as roberts challenges the dominant narrative that homo sapiens evolved in the east african savannahs these findings shed new light on the first humans as well as the cultural biases we bring to studying them roberts argues that in part we have missed signs of human life in the rainforests because it was markedly different from our own western archaeologists and anthropologists historically look for signs of cultures that dominated and permanently altered landscapes which is to say cultures that look western but life in the rainforests reveals a more flexible less domineering relationship with the land because we were looking for the wrong things we simply missed some of the earliest signs of farming practices in papua new guinea and mayan cities that were arguably some of the largest urban structures in the pre industrial world roberts reevaluates the assumptions that we bring to the study human evolution what counts as wilderness and how human societies can be organized it could not come at a more important time as both the capitalist destruction of tropical forests and misguided conservation efforts push these environments to the point of collapse blending cutting edge research and incisive social commentary jungle offers a bold vision of what the rainforests can teach us about who we are and where we come from

a roaring good guide to the secrets of the jungle this spectacular and informative guide to some of the most extraordinary habitats on earth contains superb colour photographs offering a unique eyewitness view of the remarkable and colourful plants and animals of the world s jungles see the beautiful but poisonous passionflower the rare golden lion tamarin a heckel chew stick from nigeria the red howler monkey howling at dawn a kangaroo climbing a tree learn about the indigenous peoples of the rainforest and discover what is being done to protect these valuable ecosystems the book also features a detailed reference section a wallchart and a cd of 100 clipart

the second book in a gripping new fantasy adventure series from new york times bestselling author a j hartley darwen arkwright s ordinary life changed forever when he was given a remarkable mirror a portal to the amazing but dangerous realm of silbrica in the last adventure monsters in the mirror darwen defeated the terrifying monsters which were threatening his world but someone is determined to open the portal again releasing a giant tentacled creature bent on destruction darwen ric and alexandra must

journey deep into the jungles of costa rica to solve an ancient riddle and save the world from certain destruction this time old allies can t be trusted and friends must be held close the problem with doors is that they open both ways there are monsters inside and some of them are trying to get out

our beloved characters emma and louis go on a trip through the wildest nature of our planet the rainforest

who lives in the rainforest open the pages of this book and marvel at the diversity of life there this encyclopedia is complete with pictures and other identifiers to make learning fun and engaging your child will find that reading this book is actually an adventure to be had grab a copy now

environmentalism and ecology are areas of rapid growth in academia and society at large screening nature is the first comprehensive work that groups together the wide range of concerns in the field of cinema and the environment and what could be termed posthuman cinema it comprises key readings that highlight the centrality of nature and nonhuman animals to the cinematic medium and to the language and institution of film the book offers a fresh and timely intervention into contemporary film theory through a focus on the nonhuman environment as principal register in many filmic texts screening nature offers an extensive resource for teachers undergraduate students and more advanced scholars on the intersections between the natural world and the worlds of film it emphasizes the cross cultural and geographically diverse relevance of the topic of cinema ecology

an overview of the world s rainforests and the threat of loss of the world s rainforests

in his second book grigsby has amassed a delightful collection of humorous short stories that takes us back through our youthful days of innocent pranks and rollicking fun with friends and acquaintances tales from a carolina crazy covers experiences from childhood through college days and into adulthood the adventure humor thrill of the chase and much more takes us across the united states canada as well as through the middle and far east this collection of stories written from a southerner s point of view will amuse entertain and enlighten you if you would like to find out what it was like to grow up in the south travel across country and read about foreign adventures then you ll certainly devour tales from a carolina crazy

the second book in the quirky and enchanting darwen arkwright series perfect for fans of the mysterious benedict society the world beyond the mirror holds more secrets eleven year old darwen arkwright s life changed forever when he first set foot in silbrica the wondrous and magical world beyond the mirror now he and his friends rich and alexandra the peregrine pact must journey to costa rica to save a boy who s been stolen by the insidious bleck a giant tentacled creature that leaves destruction in its wake but what at first seemed to be a single kidnapping turns out to be an elaborate conspiracy that threatens the very future of our world and this time old allies can t be trusted and the danger runs deeper than darwen could have ever imagined kirkus reviews called the first darwen book brilliant and we think you ll agree it s a completely modern take on the kind of fantasy that has delighted middle grade readers for generations

the amazon rainforest hides many secrets we explore the jungle with its giant trees its exotic plants and its colourful animal life including jaguars snakes and parrots find out what it is like to live in a rainforest discover the beautiful animals birds frogs insects flowers and trees that can be found there learn about the threat posed by the most dangerous animal of all humans this title forms part of the my first discoveries series a unique collection of beautifully illustrated information books for children aged 4 to 7 that aims to awaken children s interest in the wonders of the natural physical and human world around them there are 4 transparent overlay pages which reveal hidden surprises link ideas and show how things evolve
