this book invites the reader to explore how islamic theology and law have shaped challenged and inspired each other across centuries what does it mean for example when a legal rule embodies theological debates on divine justice we unpack questions

like this by diving into the rich history and modern day relevance of theology and legal theory in islam using rare manuscripts and new historical findings the book s contributors offer fresh perspectives on how islamic scholars tackled pressing social issues and adapted their thought to evolving contexts this work stands out for its engaging examination of islam s intellectual legacy and its potential pathways for today contributors are mohammed abdelrahman ahmad atif ahmad maha el kaisy mohammed fadel ramon harvey serdar kurnaz Abdul Rahman Mustafa Najah Nadi and David Vishanoff

the study of islamic education has hitherto remained a tangential inquiry in the broader focus of islamic studies in the wake of this neglect a renaissance of sorts has occurred in recent years reconfiguring the importance of islam s attitudes to knowledge learning and education as paramount in the study and appreciation of islamic civilization philosophies of islamic education stands in tandem to this call and takes a pioneering step in establishing the importance of its study for the educationalist academic and student alike broken into four sections it deals with theological pedagogic institutional and contemporary issues reflecting the diverse and often competing notions and practices of islamic education as a unique international collaboration bringing into conversation theologians historians philosophers teachers and sociologists of education philosophies of islamic education intends to provide fresh means for conversing with contemporary debates in ethics secularization theory child psychology multiculturalism interfaith dialogue and moral education in doing so it hopes to offer an important and timely contribution to educational studies as well as give new insight for academia in terms of conceiving learning and education

the study of islamic philosophy has entered a new and exciting phase in the last few years both the received canon of islamic philosophers and the narrative of the course of islamic philosophy are in the process of being radically questioned and revised most twentieth century western scholarship on arabic or islamic philosophy has focused on the period from the ninth century to the twelfth it is a measure of the transformation that is currently underway in the field that unlike other reference works the oxford handbook has striven to give roughly equal weight to every century from the ninth to the twentieth the handbook is also unique in that its 30 chapters are work centered rather than

person or theme centered in particular taking advantage of recent new editions and translations that have renewed interest and debate around the islamic philosophical canon the oxford handbook of islamic philosophy gives both the advanced student and active scholar in islamic philosophy theology and intellectual history a strong sense of what a work in islamic philosophy looks like and a deep view of the issues concepts and arguments that are at stake most importantly it provides an up to date portrait of contemporary scholarship on islamic philosophy

islamic philosophy has often been treated as being largely of historical interest belonging to the history of ideas rather than to philosophical study this volume successfully overturns that view emphasizing the living nature and rich diversity of the subject it examines the main thinkers and schools of thought discusses the key concepts of islamic philosophy and covers a vast geographical area this indispensable reference tool includes a comprehensive bibliography and an extensive index

this work provides a typology of islamic ethics without overlooking the chronological development four types of ethical theory are isolated the scriptural the theological the philosophical and the religious this edition contains extra material from ibn sina s writings translated into english the book should interest islamic scholars philosophers and historians of ethics

in the quest for true knowledge mysticism goes one step beyond philosophy while philosophy and mysticism are considered two distinct disciplines with their own methodological approaches in the history of islamic thought their metaphysical concepts reveal significant points of intersection their convergence follows an inherent logic in many muslim circles the methodological differences between the two are not regarded as an irreconcilable opposition philosophy seeks knowledge through rational reflection whereas mysticism deepens these insights by experiencing them in a transcendent state of consciousness the french orientalist henry corbin d 1978 argued that islamic philosophy found its true purpose only after averroes ibn rushd and especially with the isfahan school and adr ad d n mu ammad sh rāz known as mullā adrā d 1640 within the tradition of spiritual intellect in oriental wisdom this school of thought is also referred to as oriental theosophy a central question in this context is

whether this form of philosophizing in corbin s sense should be understood as a departure from rationalist tradition and a return to a spiritual mode of thinking or whether as pierre hadot d 2010 put it philosophy is not merely a particular way of viewing the world but rather a way of life in this understanding philosophizing does not simply mean speculating analyzing or theorizing but rather leading a consciously reflective life whether islamic philosophy adheres strictly to rational inquiry or transcends rationality to serve the mystical wisdom tradition ultimately depends on how philosophy is perceived within islam and what role mysticism plays in this context this edited volume examines the complex relationship between these two domains of human thought and way of life through concrete examples from the history of islamic intellectual traditions it not only elucidates the ways in which philosophy and mysticism are interconnected but also delineates the precise boundaries of their connection the contributions in this volume explore both dimensions from various perspectives highlighting their mutual influence and the intricate relationship between philosophy and mysticism

providing a guide for beginning counselors this work gives the techniques to use in clinical situations it shows characteristics of good helping relationships details verbal and nonverbal skills includes evaluation and ethics explains helping theories and research and explores client concerns
