winner of the 2017 aesa critic s choice book award this book provides multiple perspectives on the dual struggle that teacher educators currently face as they make sense of edtpa while preparing their pre service teachers for this high stakes teacher exam the adoption of nationalized teacher performance exams has raised concerns about the influence of corporate interests in teacher education the objectivity of nationalized teaching standards and ultimately the overarching political and economic interests shaping the process format and nature of assessment itself through an arc of scholarship from various perspectives this book explores a range of questions about the goals and interests at work in the roll out of the edtpa assessment and gives voice to those most affected by these policy changes teacher educators and teacher education students

the purpose of this research was to examine the relationship between the scores teacher candidates obtained on the principles of learning and teaching plt grades k 6 and the edtpa elementary literacy and identify any influence of ethnicity gender and or gpa on the performance of teacher candidates since some research about the plt suggest the exam is not an effective means to predict the readiness of new teachers several states have or are considering using a performance based assessment particularly the edtpa as a replacement of the plt however the question becomes do teacher candidates who perform well on the plt also do well on a performance based assessment such as the edtpa if not what relationships if any exist between the two measures do the relationships between performance on the plt and the edtpa differ by ethnicity or gender do students who have high as compared to lower grade point averages gpa perform differently this quantitative study was

conducted using secondary analysis from 69 teacher candidates from a dual k 6 and special education licensure area undergraduate program in a tennessee university several hierarchical multiple regressions were analyzed and data revealed a statistically significant relationship among gpa plt and edtpa no statistically significant differences were found when gender or ethnicity were considered an additional finding indicated edtpa subscores were intercorrelated while the plt subtests were not these findings suggest the plt is not as rigorous of a test as the edtpa and they do not assess some of the same components the plt is a traditional standardized test and all the subtests are stand alone measures that have very little overlap in contrast the edtpa shows to be intercorrelated and each task builds upon one another although data from this research showed positive relationships between the edtpa and the plt the findings suggest edtpa as a more viable licensure assessment option compared to the plt the edtpa is more sustainable because of the positive relationships between key categories and the real world nature of a performance based assessment and the p 12 classroom

performance assessments such as the teacher performance assessment edtpa are used by state departments of education as one measure of competency to grant teaching certification although the edtpa is used as a summative assessment research studies in other forms of performance assessments such as the performance assessment for california teachers pact and the national board certification for professional teaching standards nbcpt have shown that they can be used as learning tools for both preservice and experienced teachers and as a form of feedback for teacher education programs the present study investigated the ways in which the edtpa functioned as an opportunity to learn in one elementary teacher education program data were collected through seven teacher candidate case studies two focus groups and one cohort survey the findings indicated that there are opportunities for candidates to develop their practice through the edtpa experience there are variations in the extent to which candidates take up these opportunities to learn finally the learning opportunities are likely affected by the personal characteristics of the candidates and by the nature of interactions and collaborations they have with others in the context of their participation in the edtpa process
