semantic underspecification is an essential and pervasive property of natural language this monograph provides a comprehensive survey of the various phenomena in the field of ambiguity and vagueness the book discusses the major theories of semantic indefiniteness which have been proposed in linguistics philosophy and computer science it argues for a view of indefiniteness as the potential for further contextual specification and proposes a unified logical treatment of indefiniteness on this basis the inherent inconsistency of natural language induced by irreducible imprecision is investigated and treated in terms of a dynamic extension of the proposed logic the book is an extended edition of a german monograph and is addressed to advanced students and researchers in theoretical and computational linguistics logic philosophy of language and nl oriented ai although it makes extensive use of logical formalisms it requires only some basic familiarity with standard predicate logic concepts since all technical terms are carefully explained

this book aims at investigating from the perspective of the major economic dictionaries the notions of economic crisis and cycle the project consists in giving an extensive summary of a number of significant entries on this subject with an introductory essay to each entry placing them and the dictionary to which they belong in their context giving some details

on the author of the dictionary entry and assessing the entry's and its author's contribution the broad picture including the history of these encyclopedic tools will be examined in the introductory essays
