in her latest contribution to the growing field of emotion studies deidre pribram makes a compelling argument for why culturalist approaches to the study of emotional disorders continue to be eschewed even as the sociocultural and historical study of mental illness flourishes the author ties this phenomenon to a tension between two fundamentally different approaches to emotion an individualist approach which regards emotions as the property of the individual whether biologically or psychologically and a culturalist approach which regards emotions as collective social processes with distinctive histories and meanings that work to produce particularized subjects while she links a strong preference for the individualist construct in western culture to the rise of the psychological and psychiatric disciplines at the turn of the twentieth century pribram also engages with a diverse set of case studies tied to psychological and aesthetic discourses on emotions these range from van gogh s status as emotionally disordered to the public emotional aesthetics of 19th century melodrama to the diagnostic categories of the dsm s and the fear of globalizing emotional disorders in the 21st century this genuinely interdisciplinary approach makes for a text with potential application in a wide range of disciplines within cultural studies including sociocultural and historical analysis of psychiatry and psychology gender theory subject and identity theory popular culture studies and history and theory of the arts

the volume written by the renowned historian caroline f ware investigates the impact that changes in society and culture that can influence the writing of history and the way in which the past is evaluated as louis adamic has pointed out it is to ellis island rather than to plymouth rock that a great part of the american people trace their history in america more people have died in industrial accidents than in subduing the wilderness and fighting the revolution it is these people rather than the frontiersmen who constitute the real historical background and the heroic tradition of the mass of urban americans the attempt to write american history from the bottom up started a generation ago with the study of the frontier it has recently extended into the study of local communities and culturally homogeneous regions in the still unexplored history of the non dominant cultural groups of the industrial cities lies the story of an emerging industrial culture that represents the dynamic cultural frontier of modern america
