Dr Gao finds the best provisions and practices in respect of the fraud rule in the United States, the United Kingdom, Canada, and Australia, and applies these standards to the reformulation of the fraud rule in the PRC. In the process, he surveys the entire field of the fraud rule in the law of letters of credit in its substantive aspects, thus going deeper than mere banking law analyses and revealing, for the benefit of jurists everywhere, the fundamental legal issues that must underlie all sound judicial reasoning in the area. In more practical terms, this approach also allows judges to meet their essential responsibility of giving an answer when a case is put before them with the widest and best possible degree of discernment. **Book Jacket**

The book analyses how international law addresses interactions between international organizations in labour governance. These interactions are ubiquitous; they offer each organization an opportunity to promote its model of labour governance yet simultaneously expose it to adverse influence from others. The book captures this ambivalence and examines the capacity of international law to mitigate it based on detailed case studies of mutual influence between the International Labour Organization, the World Bank, and the Council of Europe. The book offers an in-depth analysis of the pertinent law and its key challenges both at institutional and inter-organizational level. The author envisions a law of inter-organizational interactions as a normative framework structuring interactions and enhancing the effectiveness and legitimacy of multi-institutional governance.

The commentaries were long regarded as the leading work on the development of English law and played a role in the development of the American legal system. Science has defined a variety of natural laws that explain the physical world and how it changes. One such law states that for every action there is a reaction, and that for every motion there is corresponding counter-motion, whether it is visible to the human eye or not. One thing is certain: movement and change will occur as a result. Having studied these principles, author Raymond Holliwell not only understood the universal

physical applications he also understood the spiritual and mental applications as well by using this law on a spiritual and mental level hollwell found that a specific thought could create a desired reaction in his personal and professional life through continual and dedicated practice as he came to realize the expanded potential of this powerful law he eventually recognized the ultimate source of the dramatic results god
