what are discourses are discourses real and what is real outside language in this book originally published in 1992 ian parker provides one of the clearest and most systematic introductions to discourse research and the essential theoretical debates in the area at the time it was one of the few texts to defend a realist position discuss accounts of postmodernity and set out criteria for the identification of discourses discourse dynamics is essential reading to anyone interested in project research and an understanding of the theoretical issues involved in discourse analysis the book will also be of use to students other than those studying psychology it addresses the concerns of all those looking at qualitative textual research in the human sciences and is still very much relevant today

in this age of collections that is ours many volumes of collections are published they contain contributions of several well known authors and their aim is to present a selective overview of a relevant field of study this book has the same purpose its aim is to introduce students scholars and all those interested in current problems of legal theory and legal philosophy to the work of the leading scholars in this field the large number of publications both books and articles that have been produced over recent decades makes it quite difficult however for those who are making their first steps in this domain to find firm guidelines the book is new in its genre because of its method the choice was made not to reprint an example of contributors earlier basic articles or a part of one of their books this would only give a partial view of the rich texture of their work rather the authors were asked to make an original synthesis of their own contributions to the field of legal theory and legal philosophy brought together in this volume they constitute a truly author ised view of their work this book is also new

in that each essay is complemented with bibliographical information in order to encourage further research on the author's self-selected work this will help the reader rapidly to become familiar with the whole of the published work of the contributors

first published in 1985 Kohlberg and his colleagues claimed that all one need do in moral education is change the stage or structure of an individual's moral reasoning and changes in moral behavior ego and personality style would occur as moral education entered the 1980s many important problems remained the question of the legitimacy of the highest stage is still being considered the problem of the relationship between judgment and action is receiving much attention and reformulation as well the role of affect in moral functioning has been sorely overlooked until very recently a further issue is the implication of the particular realm of one's life family school peer group workplace church for the form and effectiveness of moral education finally how can self-acknowledged moral transgressions in typical individuals be incorporated into the theory this volume reflects these problems
