identifying companies that are trading below their intrinsic value that is the real worth of the company is the main goal of value investing value investors think that illogical elements like emotions trends or passing events frequently cause the market to misprice stocks value investors hope to make money when the market price and intrinsic value eventually converge by purchasing these cheap stocks and holding them over time benjamin graham who is recognized as the father of value investing and a mentor to one of the greatest investors of all time warren buffett is credited with developing the concept of value investment security analysis 1934 and the intelligent investor 1949

two of graham's seminal works on value investing outlined the concepts and methods of value investing the margin of safety or the difference between a stock's intrinsic value and market price is one of the fundamental ideas of value investing the margin of safety acts as a buffer against unanticipated events valuation errors and market changes the potential return is bigger and the danger is lower the larger the margin of safety generally speaking value investors seek out equities with a minimum 50% margin of safety a further tenet of value investing is to pay more attention to the company's performance and quality than to stock price fluctuations to ascertain the intrinsic value of a business value investors examine its financial statements competitive advantages development prospects and managerial caliber they also search for companies with steady earnings solid financial statements minimal debt substantial returns on equity and long lasting competitive advantages being independent and contrarian or acting and thinking differently from the bulk of the market is the third value investing tenet value investors rely on their own analysis and discretion rather than following the herd or the newest trends they are swayed by the business's facts and data rather than by the opinions of analysts the media or peers as long as the stocks are inexpensive and have strong fundamentals they are not scared to purchase unpopular or overlooked stocks value investing is successful because it takes advantage of the market's inefficiencies and irrationality which frequently cause it to overreact to positive or negative news to purchase or sell stocks at favorable prices value investing is successful because it is founded on the idea of reversion to the mean which holds that exceptional circumstances eventually tend to return to average levels as a result overvalued equities typically decline to their inherent value whilst undervalued ones typically rise to theirs the long term track records of numerous renowned value investors including walter schloss joel greenblatt charlie munger seth Klarman warren Buffett and Charlie Munger attest to the strategy's success and profitability a value investment firm Tweedy, Browne Company found that between 1926 and 2012 value stocks beat growth stocks by an average of 4.6% per year during the same time span value investing beat the market index by an average of 3.1% annually value investing is a methodical and logical

way to invest that aims to purchase companies that are selling for less than their true value and hold onto them until they rise to their market value value investors lower risk and boost return by adhering to the concepts of contrarianism business analysis and margin of safety value investing is successful because it capitalizes on the irrationalities and inefficiencies of the market as well as the reversion to the mean theory value investing is a long term approach that calls for perseverance commitment and conviction rather than a get rich quick plan

26 real world value investing case studies from thesis to outcome value investing theory is everywhere but how do the real practicing value investors go about analyzing and picking stocks for their portfolios is it better for an aspiring value investor to learn the theory of value investing or should they review the practical examples in the form of case studies value investing in practice is different than value investing in theory in theory there are formulas and calculations and models you can view each stock through these lenses and it either passes or

fails in practice lines are not as sharply defined value investors often make calls based on imprecise information most of these situations are atypical and therefore making reliable future estimates is an exercise in futility and of course the future is never what you imagine it to be stock market success depends on knowing the science theory but also the art of value investing the art comes from experience mainly your own but also the experience of other value investors who are practicing in the field this is where these case studies can be very helpful at value stock guide we have created a vast body of work in value investing with our past investments this volume covers the investments we made and exited between 2011 and 2017 each investment is a case study in itself and highlights the value investment process from due diligence to purchase and eventual profit realization whether you are a student of investment analysis or perhaps a value investor yourself you will find many little nuggets of wisdom in these case studies you will see many different situations and scenarios play out and how we at vsgr responded to these scenarios and you will also see the outcome of each of the investments you will learn to analyze stocks properly create processes to keep you disciplined and you will also learn to keep your calm when an investment does not go your way and figure out a way of avoiding a loss you will also learn the importance of not losing money much of the material is in the form of the communication we sent to our clients when each of these stocks was recommended therefore the tone is conversational not pedantic at all and the material is not overly technical one of the things i truly believe in is if you are not able to explain the reasons why you are buying a stock to a 5 year old you perhaps do not understand the stock well enough
