because only he can read the magical map young weak and timid rowan joins six other villagers to climb a mountain and try to restore their water supply as fears of a dragon and other horrors threaten to drive them back

this collection of essays by indonesian and foreign contributors offers new and highly original analyses of the mass violence in indonesia which began in 1965 and its aftermath fifty years on from one the largest genocides of the twentieth century they probe the causes dynamics and legacies of this violence through the use of a wide range of sources and different scholarly lenses chapter 12 of this book is available open access under a cc by 4 0 license at link.springer.com

in the late 1970s the new christian right emerged as a formidable political force boldly announcing itself as a unified movement representing the views of a moral majority but that

movement did not spring fully formed from its predecessors american evangelicals and the 1960s refutes the thesis that evangelical politics were a purely inflammatory backlash against the cultural and political upheaval of the decade bringing together fresh research and innovative interpretations this book demonstrates that evangelicals actually participated in broader american developments during the long 1960s that the evangelical constituency was more diverse than often noted and that the notion of right wing evangelical politics as a backlash was a later creation serving the interests of both republican conservative alliances and their critics evangelicalism s involvement with rather than its reaction against the main social movements public policy initiatives and cultural transformations of the 1960s proved significant in its 1970s political ascendance twelve essays that range thematically from the oil industry to prison ministry and from american counterculture to the second vatican council depict modern evangelicalism both as a religious movement with its own internal dynamics and as one fully integrated into general american history

political correctness idealizing the oppressed and an affinity for authoritarian and charismatic leaders are all parts of what ellis calls the dark side of the left

the narrative has two parallel lines of development which constantly interact with each other the political transformation of china during the critical dozen years 1977 89 and the cultural movement itself the latter is followed from an abortive attempt in 1982 to publish the minjian journal youthful manuscripts through the blossoming of many popular cultural enterprises including the potent river elegy television series and finally to the tiananmen tragedy at which point the two lines of development finally coalesced the book is filled with details including the background character and personal connections of a large number of people who are related to the movement which make interesting reading and can be a useful source for further studies

exposing the liberal bias in today s universities this book provides hard evidence that shows how today s colleges are covertly and overtly proselytizing with leftist slants on sexuality politics and lifestyles

the editorial aim is to present condensations of articles taken from the leading professional and lay publications

this book demonstrates how colleges and universities have played a vital role during times of great crisis in american history responding actively and helpfully to all the major challenges confronting their country the colleges of the land became politicized repeatedly by such momentous developments as the american revolution the civil war between the north and the south the two vast global conflicts of the twentieth century and america s controversial involvement in southeast asia campus life became intensely fractious during these difficult and turbulent periods violence sometimes accompanied the campus activism while there were significant differences in the response of groups on the campuses students and professors reacted differently for example to the crises of earlier times as compared to those in more recent years there is an element of continuity that thread of continuity from the revolutionary era to vietnam was the fact that time after time the members of the academic communities sought to resolve the nation s crises constructively they rallied to the cause of colonial rights and ultimately political independence they supported the aims of their embattled sections north and south they sought to influence their nation s responses to the global crises of the twentieth century and they campaigned to extricate the nation from an increasingly costly military entanglement in southeast asia in all five of these tests of national purpose the colleges and universities while not the ultimate decision makers helped shape the eventual patterns of america s response in an important way
