the theme of this book evolved from the idea of linking three concepts around food traceability ethics and informed choice we believe that the current development and implementation of traceability in the agri food sector offers an interesting way not only of

handling food safety but also of addressing and communicating ethical issues arising from current food production practices in the agri food sector worry food consumers as we all are since we need to eat and drink to stay alive but how can consumers act upon their concerns paradoxically although consumers are bombarded with information on food from the media the food industry food authorities ngos and interest groups details about how foods are actually produced is often hard to find much of the information available is superficial conflicting or partial and it is hard for consumers seeking to make informed food choices to know which information to trust the consumers we interviewed for this project felt that information about food products was withheld and manipulated traceability which provides a record of the history and journey of a given food and which is increasingly used in the food sector for legal and commercial reasons has the potential to communicate a more authentic picture of how food is produced
