wealth and the wealthy have received relatively little attention from social scientists despite a growing wealth gap aimed at a broad social science and public readership this book draws on new data on wealth to answer the following key questions what is wealth who has got it where might we draw a wealth line who lies above it and what might policy do about wealth and the wealthy using data sources from the hmrc to the sunday times rich list this book provides a comprehensive and critical discussion of these issues and looks at potential policy responses including asset based welfare and taxation

the new inequality of the 1980s and 1990s has given rise to a lively debate about the relationship between economic growth and income distribution this debate provides the background for this study which details the long term development of income and wealth inequality in the netherlands the study begins with the hypothesis by simon kuznetz that income inequality increased during the first phase of modern economic growth but that the second phase which took place in most western countries around the turn of the twentieth century experienced a leveling out of income differences the development of inequality during the golden age when growth resulted in a marked increase in inequality seems to confirm this idea however the analysis of the connection between growth and inequality in the nineteenth and twentieth century leads many to question the kuznetz hypothesis lee soltow is professor of economics at ohio university athens jan luiten van zanden is professor of economics and social history at utrecht university the netherlands and at the international institute for social history

this book answers a number of important questions about the distribution of wealth among people and the way that this distribution has changed over time it provides a comprehensive analysis of the personal distribution of wealth from many dimensions economic statistical ethical political sociological and legal using data from 21 countries this book demonstrates how inequality in the distribution of wealth varies between different parts of the world and how it evolves with particular emphasis on the claim that there has been a long term and continued increase in inequality since the 1970s in most countries it discusses alternative ways of measuring the degree of inequality analyses thomas piketty s claim that society has become more unequal in recent decades and assesses the relative importance of the various

determinants of the distribution of wealth the authors explain why the distribution of wealth is unequal and discuss how it could be changed with alternative policies and the possible consequences of these policies for economic efficiency the authors also compare the different distributions of wealth that are implied by alternative views of society this is a valuable resource for students and academics in economics political science and sociology seeking a state of the art account of the theory and evidence surrounding inequality in the distribution of wealth

drawing on some recent research especially that of piketty and his associates and on older ideas particularly from sir arthur lewis roger mccain proposes policies that together would aim to reverse the observed tendency towards the concentration of wealth in market economies thus approach equality the shortcomings and dangers of rising wealth inequality are discussed both from the point of view of increasing instability and of equalitarian values

there has been a remarkable upsurge of debate about increasing inequalities and their societal implications reinforced by the economic crisis but bubbling to the surface before it this has been seen in popular discourse media coverage political debate and research in the social sciences the central questions addressed by this book and the major research project gini on which it is based are have inequalities in income wealth and education increased over the past 30 years or so across the rich countries and if so why what are the social cultural and political impacts of increasing inequalities in income wealth and education what are the implications for policy and for the future development of welfare states in seeking to answer these questions this book adopts an interdisciplinary approach that draws on economics sociology and political science and applies this approach to learning from the experiences over the last three decades of european countries together with the usa japan canada australia and south korea it combines comparative research with lessons from specific country experiences and highlights the challenges in seeking to adequately assess the factors underpinning increasing inequalities and to identify the channels through which these may impact on key social and political outcomes as well as the importance of framing inequality trends and impacts in the institutional and policy context of the country in question

this state of the art volume presents comparative empirical research on a topic that has long preoccupied scholars politicians and everyday citizens economic inequality while income and wealth inequality across all populations is the primary focus the

contributions to this book pay special attention to the middle class a segment often not addressed in inequality literature written by leading scholars in the field of economic inequality all 17 chapters draw on microdata from the databases of lis an esteemed cross national data center based in luxembourg using lis data to structure a comparative approach the contributors paint a complex portrait of inequality across affluent countries at the beginning of the 21st century the volume also trail blazes new research into inequality in countries newly entering the lis databases including japan iceland india and south africa

wealth inequality has been not only rising at unsustainable pace but also dissociated from income inequality because of the fact that wealth is increasing without concomitant increase in savings and productive capital compelling evidence indicates that capital gains and other economic rents are mainly responsible for wealth inequality and its divergence from income inequality the main argument of the book is that interest based debt contracts are one of the drivers of wealth inequality through creating disproportional economic rents for the asset rich the book also introduces the idea of risk sharing asset based redistribution which is a novel and viable policy proposal as an effective redistribution tool to address the wealth inequality problem furthermore a large scale stock flow consistent macroeconomic model which is step by step constructed in the book sheds light on the formation of wealth inequality in a debt based economy and on the prospective benefits of implementing risk sharing asset based redistribution policy tools compared to traditional redistribution policy options the research presented in this book is novel in many respects and first of its kind in the islamic economics and finance literature

the research handbook on intergenerational inequality is motivated by a core question in social science to what extent does one s family background and childhood experience predict success in life bringing together experts in their respective fields from across the globe this innovative research handbook provides a comprehensive multidisciplinary account of the rich research on intergenerational inequality focusing on its origins in sociology and economics this title contains one or more open access chapters

this book will summarize what we know about technology and inequality across disciplines and seek out new ways to analyze this relationship based on technology and business practices with the objective of restoring digital technology as an engine of opportunity besides the unique focus on the role of technology in

inequality the book will have a unifying theme of tracing wealth creation and wealth capture in the technology sector and relating specific practices what technology companies actually do to larger shifts in wealth and power a clear conceptual framework will be used to analyze key industry case studies search engines social media and the sharing economy

comprehensively updated to match the 2020 syllabus and written by two experienced ib economics teachers this study tool presents all the content knowledge covered at standard and higher level with its focused approach it distinctly strengthens comprehension of the subject ensuring learners confidence and achievement in the ib diploma

during the last few decades the gap between the incomes wealth and living standards of rich and poor people has increased in most countries economic inequality has become a defining issue of our age in this book leading political economist frank stilwell provides a comprehensive overview of the nature causes and consequences of this growing divide he shows how we can understand inequalities of wealth and incomes globally and nationally examines the scale of the problem and explains how it affects our wellbeing he also shows that although governments are often committed to growth at all costs and trickle down economics there are alternative public policies that could be used to narrow the gap between rich and poor stilwell s engaging and clear guide to the issues will be indispensable reading for all students general readers and scholars interested in inequality in political economy economics public policy and beyond

this title was first published in 1991 this collection focuses on the concepts and measurements of inequality poverty the concentration of wealth and the implications of these issues for social policies a special feature of this work is the international comparisons of the evidence on economic inequality

utilizing existing data and new research methods keister examines household wealth distribution from 1962 to 1995

about this book at a time when the divide between the wealthy and the disadvantaged is widening this major textbook provides students with a critical understanding of poverty and social exclusion in relation to wealth rather than as separate from it raising fundamental questions about the organisation of society social structures and relationships and social justice the book is split into four main sections exploring key concepts and issues people

and place poverty and wealth across different groups and situations the role of the state and prospects for the future this is the only textbook to focus on the links between wealth and poverty and contains an edited collection of chapters specially written by a distinguished panel of contributors including pete alcock daniel dorling mary shaw gill scott and jay ginn it is designed with the needs of students in mind and includes useful chapter summaries illustrative boxes and diagrams and pointers to relevant websites and other sources of further information this is an essential textbook for level 1 2 undergraduate students studying social policy either as a main subject or as part of their course it is a core text for level 3 4 specialist modules in this field about the author tess ridge is a lecturer in social policy at the university of bath she is a trustee of the child poverty action group and honorary secretary of the social policy association dr sharon wright is lecturer in social policy at the university of stirling sharon is managing co editor of the journal social policy society and co convenor of the scottish social policy network

this concise encyclopedia is the most complete international survey of sociology ever created in one volume contains over 800 entries from the whole breadth of the discipline distilled from the highly regarded blackwell encyclopedia of sociology with entries completely revised and updated to provide succinct and up to date coverage of the fundamental topics global in scope both in terms of topics and contributors each entry includes references and suggestions for further reading cross referencing allows easy movement around the volume

inheritance as a determinant of personal wealth inferences from data on married men and women implications of the life cycle hypothesis and the wealth age association intergenerational wealth relationships

recently u s media policymakers and commentators of all stripes have been preoccupied with the nation s border with mexico airwaves websites and blogs are filled with concerns over border issues illegal immigrants drug wars narcotics trafficking and securing the border while this is a valid conversation it s rarely contrasted with the other u s border with canada still the longest unguarded border on earth in this fascinating book originally published in spain to much acclaim researcher íñigo moré looks at the bigger picture with a professionally trained eye he examines the world s top twenty most unequal borders what he finds is that many of these border situations share similar characteristics there is always illegal immigration from the poor country to the wealthy one there

is always trafficking in illegal substances and the unequal neighbors usually regard each other with suspicion or even open hostility after surveying the top twenty more explores in depth the cases of three borders between germany and poland spain and morocco and the united states and mexico the core problem he concludes is not drugs or immigration or self protection rather the problem is inequality itself unequal borders result he writes from a skewed interaction among markets people and states using these findings more builds a useful new framework for analyzing border dynamics from a quantitative view based on economic inequality the borders of inequality illustrates how longstanding multidirectional misunderstandings can exacerbate cross border problems and consequent public opinion perpetuating these misunderstandings can inflame and complicate the situation but purposeful efforts to reduce inequality can produce promising results
