a pioneer in evolutionary game theory looks at selfishness and cooperation how does cooperation emerge among selfish individuals when do people share resources punish those they consider unfair and engage in joint enterprises these questions fascinate philosophers biologists and economists alike for the invisible hand that should turn selfish efforts into public benefit is not always at work the calculus of selfishness looks at social dilemmas where cooperative motivations are subverted and self interest becomes self defeating karl sigmund a pioneer in evolutionary game theory uses simple and well known game theory models to examine the foundations of collective action and the effects of reciprocity and reputation focusing on some of the best known social and economic experiments including games such as the prisoner s dilemma trust ultimatum snowdrift and public good sigmund explores the conditions leading to cooperative strategies his approach is based on evolutionary game dynamics applied to deterministic and probabilistic models of economic interactions exploring basic strategic interactions among individuals guided by self interest and caught in social traps the calculus of selfishness analyzes to what extent one key facet of human nature selfishness can lead to cooperation

why do we volunteer time why do we contribute money why even do we vote if the effect of a single vote is negligible rationality based microeconomic models are hard pressed to explain such social behavior but howard margolis proposes a solution he suggests that within each person there are two selves one selfish and the other group oriented and that the individual follows a darwinian rule for

allocating resources between those two selves howard margolis's intriguing ideas provide an alternative to the crude models of rational choice that have dominated economics and political science for too long times literary supplement

this book explores the relationship between religion and politics in england from the accession of george iii to the first reform bill considering the political and social ideas of catholics anglicans methodists dissenters deists and atheists it examines the effect of the french revolution on christian political and social theory as well as reactions to the american revolution riots and disorder economic and social education secularisation blasphemy and sedition the growth of atheism and the reform of the constitution in 1826 32 major figures such as burke paine wollstonecraft coleridge bentham and wesley are considered but popular everyday arguments are also analysed the book examines christian views on political obligation and the right of rebellion and suggests that religion was used as a means of social control to maintain public order and stability in a rapidly changing society

this book presents three social action models rational normative and emotional it proposes the emotional model of social action and shows the many ways in which social structures formal organizations and social movements are pervaded by emotions the core of the book contains three empirical case studies focused on the question of how emotions interests and symbolic worlds account for conformism and defiance its last part assesses the current state of the theory of social movements and the sociology of emotions it suggests how their agendas could be expanded

the study of islamic economics provides an interesting complement to conventional economics as they both study economic behaviour to enhance human well being muhammad akram khan articulates an expert view on how to

use distinct approaches to achieve this in the context of islamic economics

the thesis advanced in this book is that feeling and cognition actualize through a process that originates in older brain formations and develops outward through limbic and cortical fields through the self concept and private space into as the world an iteration of this transition deposits acts objects feelings and utterances value is a mode of conceptual feeling that depends on the dominant phase in this transition from desire through interest to object worth among the topics covered are subjective time and change the epochal nature of objects and their temporal extensibility and the evolution of value from inorganic matter into organic form the theory of microgenesis informs this work according to this theory acts and objects evolve in milliseconds through phases that replicate patterns in forebrain evolution the progression in the actualization of the mind brain state is from archaic to recent in brain formation from unity to diversity from past to present and from mind to world an account is given of the diversity of felt experience avoiding the reductionist moves characteristic of biological materialism and the inherent dualism of psychoanalytic and related theories this book is intended for any reader interested in the psychology of the inner life and philosophy of mind including philosophers psychologists psychiatrists and others with an interest in problems of value and moral feeling
