the two pizza rule new pay the ladder of inference the reciprocity ring tools of cooperation servant leadership consensus versus consent north star metrics the trust triangle the xy theory flat hierarchies nunchi

thimblesofplenty is a group of friends who also happen to be business people and avid readers we wanted to keep up with the latest business books but found that time was a factor so we divided out the work and each of us took a book and summarised it for the others we though it might be a great idea to share these summaries with you for a small price and a 3 minute time investment our summary gives you some of the wisdom from the book some food for thought and hopefully the impetus to make some time to read the whole book

most of us face the same questions every day what do i want how can i get it how can i live more happily and work more efficiently this updated edition of the international bestseller distils into a single volume the fifty best decision making models used on mba courses and elsewhere that will help you tackle these important questions from the well known the eisenhower matrix for time management to the less familiar but equally useful the swiss cheese model it will even show you how to remember everything you ll have learned by the end of it stylish and compact this little book is a powerful asset whether you need to plot a presentation assess someone s business idea or get to know yourself better this unique guide will help you simplify any problem and take steps towards the right decision

mikael krogerus and roman tschäppeler have tested the 44 most important communication theories and distilled them in book form alongside clear and entertaining illustrations want better conversations ask open ended questions that have no right or wrong answers make your partner feel brilliant want better meetings ban smartphones use a timer and make everyone stand up want better business deals focus on the thing rather than the person on similarities rather than differences and on good outcomes rather than perfect ones whether you want to present ideas more clearly improve your small talk or master the art of introspection the communication book delivers fusing theoretical knowledge and practical advice in a small but mighty package with sections on work the self relationships and language this book is indispensable for anyone who wants to improve what they say and how they say it

what would be your ideal job if you didn t have to worry about money would you like to have more responsibility or less how far would you go for a promotion when did you last stand up for what you believe in what are you afraid of in this unique handbook to your own

life and work there are no right or wrong answers only honest ones featuring sections on subjects everyone can relate to from the professional work and finance to the personal sex and relationships the question book can be used alone like a journal or with a colleague partner or friend it will probe and enlighten on everything including what your boss really thinks about you whether you are in the right job and what motivates you to get out of bed every morning these wide ranging questions which provoke short yes or no s as well as open ended responses that dig deeper are pertinent direct and compulsively fun to answer in the question book you are under the spotlight and only you have the answer

a mindful revolution is reshaping the workplace the world s most dynamic businesspeople are using mindfulness to become happier and more fulfilled at work and more successful in mindful work new york times business reporter david gelles explains how mindful managers are using meditation yoga and other mindfulness techniques to boost leadership reduce stress and improve health featuring insights from revitalised employees high level managers at global companies and meditation masters mindful work is an inspirational guide to the upsurge in mindfulness among companies as diverse as google facebook and general mills blending timeless insights and modern day management theory gelles explains the practical benefits of the mindfulness boom and offers a programme for changing the way we work a change that will make us less stressed more focused and happier

an essential library of tests for self knowledge and success from the strategic thinking experts behind the international bestseller the decision book are you clever can you self motivate are you creative how do you handle money can you lead others well with their trademark style and wit best selling authors mikael krogerus and roman tschäppeler present sixty four tests spanning intelligence and personality type creativity and leadership skills fitness and lifestyle and knowledge and belief from what you see in a rorschach test to comparing your workout against a navy seal s from eq to iq and myers briggs in between the test book offers a panoply of ways to assess yourself and decide what you need to succeed as krogerus and tschäppeler highlight you can only know whether you have the right skills the right job or the right partner when you know where you stand right now small enough to fit in your pocket but packed with insight and good humor the test book delivers a quick fun way to evaluate your life and happiness

in 2013 i wrote a book 1 at the time i wanted to explain neural networks in simple terms i had high school students at my mind i have expressed my concerns that machine learning was dominating the world and people had no idea about it smartphones were not popular in brazil and started go gain attention as personal computers deep learning started to gain momentum on 2012 and

nowadays is kind of the rule at the time youtube was bad pretty bad a must say i used to save the links to my videos as so i could avoid passing through the main page computational thinking is synonymous of algorithms i cannot think a single computational routine which is not an algorithm after all computers are stupid they need to be told what to do even when it is abstract e g machine learning what is computational think though think like this a thought experiment suppose you give your result from your model to someone do you believe the person would be able to tell the difference between your solution from your algorithm and a human if not this is computational thinking it is a machine i e an algorithm a routine doing human thinking work as we are going to see based on kasabov s work we may actually be able to send thinking loads to computers in the future initially this book supposes to be called computational intelligence nonetheless i thought we do not necessarily need intelligence to build models not in the sense to artificial intelligence or even human intelligence furthermore as we shall learn from daniel kahneman and colleagues we can achieve nice models for decision making even with simple models when compared to humans imagine what we can do with machine learning cloud computing databases such as mongodb and firebase possible public developers wanting to expand their horizon here i am being modest i feel any web coder should learn computational thinking as so they can add intelligence to their dummy apps people from computational intelligence waiting to learn new tricks computer scientists for sure i would recommend to computational biologists and anyone interested in bioinformatics applied mathematics and computational mathematician for sure anyone that is opened to new ideas but has a minimum computer programming background maybe medical doctors and biologists one of my phd advisors was a surgeon with a phd in mathematics thus we may have this profile in medicine and especially in biology external resources and tricks my github profile our sandbox i have used links to my linkedin profile to posts related to the discussions feel free to start a conversation on linkedin or to connect just comment on the posts and i will be noticed i have used several external links to articles online this is in addition to the classical academic reference standard with special release of my selected assays from medium on computer programming artificial intelligence 1 redes neurais em termos simples como aprendemos pensamos e modelamos academia edu 18365339 redes neurais em termos simples como aprendemos pensamos e modelamos fbclid iwar3nlqt003l5qxzqnlsepixjxuf7nbqsthejj8rb1zgfpgegzkiqonfo0ry accessed on 30 06 22

the ability to quickly make good decisions is the hallmark for transformational presence the ability to make decisions that work is an essential characteristic that the world has been and is still yelling for the world is crying groaning yelling for most of us to revisit our decision making processes to incorporate transformational presence and to incorporate even the basics of genuine transformation within ourselves and around us this book is a transformational guide to making such decisions that work on the bigger picture the

book introduces models and concepts to effective and transformational decision making skills at a time when most people have put off making decisions by endlessly searching for more information or entirely outsourcing other people to offer their recommendations there is an increasing peril of dependence in decision making among most individuals a fundamental question cannot be answered by someone else individuals families organizations and societies have the wisdom and capacity to champion transformation by refining their decision making capacities to refine that capacity it is essential to create light within self by igniting your decision making capacity through enhancing your perception and intelligence

the sole purpose of this book is to explore five hundred ways that will add to your success in selling and to encourage and motivate all salespeople in achieving high success in selling irrespective of what they sell you will learn good expertise to gain confidence in successful selling this book is written in simple and easy to understand english the best part of this book is that you can start reading it from any page this book is dedicated to all the people who are in sales or willing to start their career in sales to benefit others and to all those who wish to graduate in successful selling everyone is into sales since birth a child asking for chocolates and toys from his her parents is also doing a type of sales to fulfill his requirements a student giving clarifications to teacher on not completing the homework is also selling his reasons to convince them dating also involves selling of a love filled heart and promises of togetherness a lone old person wanting to stay with his son daughter in law and grandchildren is also selling his desire to end his loneliness and wanting attention for his care so we all are sellers since birth aren t we

we re all selling something every day whether at work or closer to home but with advanced technology and mass competition it s never been harder to capture people s attention that s why we need to develop our sales mind mastering our innate selling skills will help us cut through the noise in any situation drawing on the wisdom of psychology mindfulness and cultural history as well as a lifetime in sales helen kensett has created 48 beautifully illustrated tools to help you become more focused and develop a more mindful approach gather crucial knowledge about your buyer market and what you re selling identify and communicate clearly the key aspects of your pitch up your creativity generate the best ideas and close the deal from quick tricks for getting focused to simple skills like writing killer emails sales mind is full of practical tools real world tips and psychological insights to help you improve your selling at every step

newton s law might explain why ketchup drips from your burger but it can t explain why it happens every time you wear a white shirt

that would be murphy s law if something can go wrong it will just as the laws of physics govern the natural world our working lives are shaped by unwritten rules that won t appear in textbooks but whose impact is no less significant here the bestselling authors of the decision book bring together the best timeless principles proven methods and unwritten laws that determine success in today s workplace some are immediately intuitive others are backed by long study some are world famous others among the best kept secrets of the professionals but they all have one thing in common they come from lived experience and they explain modern working life better than any mba from the peter principle every employee rises to the level of their incompetence to agnes allen s law it s easier to get into something than it is to get out and from kiss keep it simple stupid to the ikea effect we re biased towards things we ve had a part in making these simple models will help you think more clearly make smarter decisions and survive any amount of stupidity the world throws at you

as design continues to impact our products services and solutions at scale it is more important than ever to understand the systems and context that surround design decisions closing the loop will introduce you to a powerful systems thinking mindset and provide you with the tools and frameworks to define the systems that surround your work cababa s book comes at a crucial moment for design and points the way toward a more inclusive meaningful future for our work david dylan thomas author design for cognitive bias who should read this book this book is for practitioners who want to incorporate systems thinking methods into their practice design researchers strategists and experience designers will benefit from the book s tools and instruction to broaden their perspectives as well as people from technology healthcare education and other spaces in which human centered design is incorporated takeaways readers will learn to combine user centered design with systems thinking to understand interconnections and interventions to create goals that benefit society expand their thinking about what constitutes problem solving in order to reframe problem spaces map the status quo in order to better envision the future kick off primary research by conducting interviews with subject matter experts use stakeholder maps as a form of analysis and synthesis output create a causal loop map to articulate systems forces in the form of cause and effect develop a theory of change to plan initiatives that will lead to the desired outcomes and impact use the futures wheel as a tool to imagine the impact of decisions

este libro le ayudará a resolver con éxito las cuestiones más complejas de una forma sencilla en él se incluyen los cincuenta modelos de toma de decisiones más conocidos descritos de forma breve y acompañados por un gráfico ilustrativo a la hora de tomar una decisión importante le permitirá simplificar los problemas y le guiará en la dirección adecuada no acaba de decidirse
