this book examines the globalization trends in higher education from an international political science perspective using nye's theory of soft power to explore the rationale behind it. It focuses on conceptualizing the soft power conversion model of higher education which is embedded in the globalization of higher education and analyzes the globalization of Chinese higher education reform. Also, this book provides innovative and unique viewpoints on conceptualizing and mapping the globalization and internationalization of higher education especially for current Chinese higher education (1949-2016). It discusses and illustrates cutting edge concepts of global higher education such as global learning, global competency, and global citizenship and refines them in the conceptualized soft power conversion model of higher education. This book reports on and enriches the theoretical concept of global education and provides practical insights into global learning, global citizenship, and global competency for Chinese undergraduate students.

This is an open access book still related to the big theme of reinforcement the SDGs at the previous conference. We try to invite academics and researchers in the world to participate in the 3rd Borobudur International Symposium 2021 (3rd Bis 2021). As we know, the COVID-19 pandemic and its impact on all 17 SDGs have demonstrated that what began as a health catastrophe swiftly transformed into a human and socioeconomic crisis. In September 2019, the UN Secretary General urged all sectors of society to mobilize for a decade of action on three fronts: global action to ensure increased leadership, increased resources, and smarter solutions for the sustainable development goals; local action to embed the necessary transitions into governments' policies, budgets, institutions, and regulatory frameworks; and international action to ensure greater leadership, increased resources, and smarter solutions for the sustainable development goals. Especially in 3rd Bis 2021, we brought up decade of action towards environmental issues, advancing the innovation to recover our planet as main theme. The conference will be held on Wednesday, December 15, 2021, in Magelang, Central Java, Indonesia. Scope includes art, linguistics, communication, economics, education, government studies, health administration, hospitality, international relations, law, pharmacy, political studies, psychology, public health, religious studies, sociology, and health sciences.

The *Handbook of Mathematical Fluid Dynamics* is a compendium of essays that provides a survey of the major topics in the subject. Each article traces developments, surveys the results of the past decade, discusses the current state of knowledge, and presents major future directions and open problems. Extensive bibliographic material is provided. The book is intended to be useful both to experts in the field and to mathematicians and other scientists who wish to learn about or begin research in mathematical fluid dynamics. The handbook illuminates an exciting subject that involves rigorous mathematical theory applied to an important physical problem, namely the motion of fluids.

john rennie short disagrees with the common negative stereotype of globalization arguing that the world today actually thrives on local differences and that a global polity tends to reinforce not repress the power of individual nation states

law in civil society advances a new and comprehensive theory of how legal institutions should be reformed to uphold the property family and economic rights of individuals in civil society in so doing it offers a powerful challenge to the dominant legal theories and practices espoused by liberalism positivism natural law and critical legal thought winfield argues against the prevailing assumptions of legal philosophers who dogmatically embrace formal or historical conceptions of law true law he contends must be constructed within the context of the different spheres of rights and ultimately can only exist within a civil society committed to self determination and

community working from these fundamental premises he analyzes in detail a rich array of important legal issues fair access to legal representation the rationale for jury trials appropriate distinctions between civil and criminal legal procedures the controversies pitting common law versus codification and adversarial versus inquisitorial systems of trial and the relationship between civil society and the state much inspired by hegel s philosophy of right winfield s study offers the most convincing critique yet of that renowned philosopher s work and in the process provides a more complete and coherent conception of law than hegel himself articulated provocative and highly instructive the book should attract scholars teachers and students in legal and political philosophy and anyone else with an abiding interest in the foundations of western law
