apartheid and beyond offers trenchant historically sensitive readings of writings by coetzee gordimer fugard tlali dike magona and mda focusing on the intimate relationship between place subjectivity and literary form it also explores the way apartheid functioned in its day to day operations as a geographical system of control exerting its power through such spatial mechanisms as residential segregation bantustans passes and prisons throughout the study rita barnard provides historical context by highlighting key events such as colonial occupation the creation of black townships migration forced removals the emergence of informal settlements and the gradual integration of white cities apartheid and beyond is both an innovative account of an important body of politically inflected literature and an imaginative reflection on the socio spatial aspects of the transition from apartheid to democracy

ecoambiguity community and development takes stock of cultural and environmental contexts in many different regions of the world by exploring literature and film artists and scholars working in the social ecology environmental justice and postcolonial arenas have long recognized that as soon as we tug on a thread of ecodegradation we generally find it linked to some form of cultural oppression the reverse is also often true in the spirit of postcolonial ecocriticism the studies collected by scott slovic r swarnalatha and vidya sarveswaran emphasize the impossibility of disentangling environmental and cultural problems while not all the authors explicitly invoke karen thornber s term ecoambiguity or the concepts and terminology of postcolonial ecocriticism their articles frequently bring to light various ironies for example the fact that ukrainian environmental experience in the twenty first century is defined by one of the world s most infamous industrial disasters the chernobyl nuclear accident of 1986 yet ukrainian culture like many throughout the world actually cherishes a profound even animistic attachment to the wonders of nature the repetition of this and other paradoxes in human cultural responses to the more than human world reinforces our sense of the congruities and idiosyncrasies of human culture every human culture regardless of its condition of economic and industrial development has produced its own version of environmental literature and art but the nuances of this work reflect that culture s precise social and geophysical circumstances in various ways these stories of community and development from across the planet converge and diverge as told and explained by distinguished scholars many of whom come from the cultures represented in these articles

the concept of fabulation makes a late appearance in deleuze s career and in only limited detail but by tracing its connections to other concepts and situating them within deleuze s general aesthetics ronald

bogue develops a theory of fabulation which he proposes as the guiding principle of a deleuzian approach to literary narrative fabulation he argues entails becoming other experimenting on the real legending and inventing a people to come as well as an understanding of time informed by deleuze s chronos aion distinction and his theory of the three passive syntheses of time in close readings of contemporary novels by zakes mda arundhati roy roberto bolano assia djebar and richard flanagan he demonstrates the usefulness of fabulation as a critical tool while exploring the problematic relationship between history and story telling which all five novelists adopt as a central thematic concern this is an original and exciting project by a highly respected specialist in the field
