this volume carries the proceedings of the vahouny fiber symposium which took place in washington dc in march of 1996 george v vahouny pioneered this conference which was conceived as a means of exchanging information on the latest advances in fiber research the conference was renamed in george vahouny s honor after his untimely death in this volume we have included the reminiscences of prof a r p walker one of the pioneers in the field and discussion of the epidemiological findings relating dietary fiber to heart disease cancer and gastrointestinal disease as the overall definition of fiber has broadened we have included for discussion other aspects of carbohydrate chem istry and metabolism complex carbohydrates were the subject of a full session and resis tant starch and the role s of oligosaccharides were discussed later in the meeting another area of fiber metabolism that is beginning to burgeon is that of the short chain fatty acids and this too was the subject of presentations and discussion in addition the more familiar topics in dietary fiber were updated workshops devoted to specific areas of fiber research have now become a mainstay of these meetings and they were repeated successfully due to restraints on spending the attendance at this meeting was somewhat smaller than usual but the discussion was lively and pertinent we are deeply grateful to our sponsors and contributors for their continuing interest in dietary fiber research and for their generous support of this symposium

the first source to collect the latest evidence linking carotenoids to human health and disease this stimulating reference studies the role of carotenoids in the prevention of chronic disease and reviews breakthrough studies from more than 40 field authorities on the latest research the book reveals the most recent findings regarding the use of c

well written and the content is clearly presented there are plentiful figures and tables which are effectively labeled and adequately support the content highly recommended for academic and special libraries effectively presents current research on phytochemicals in a readable manner e streams this landmark volume shows h

this is the first international and inter disciplinary social science handbook on health and medicine five years in the making and

building on the insights and advice of an international editorial board the book brings together world class figures to provide an indispensable comprehensive resource book on social science health and medicine pinpointing the focal issues of research and debate in one volume the material is organized into three sections social and cultural frameworks of analysis the experience of health and illness and health care systems and practices each section consists of specially commissioned chapters designed to examine the vital conceptual and methodological practice and policy issues readers receive

in the 1850s drapetomania was the medical term for a disease found among black slaves in the united states the main symptom was a strange desire to run away from their masters in earlier centuries gout was understood as a metabolic disease of the affluent so much so that it became a badge of uppercrust honor and a medical excuse to avoid hard work today is there such a thing as mental illness or is mental illness just a myth is alzheimer's really a disease what is menopause a biological or a social construction historically one can see that health disease and illness are concepts that have been ever fluid modern science sociology philosophy even society among other factors constantly have these issues under microscopes learning more defining and redefining ever more exactly yet often that scrutiny instead of leading toward hard answers only leads to more questions health disease and illness brings together a sterling list of classic and contemporary thinkers to examine the history state and future of ever changing concepts in medicine divided into four parts historical discussions characterizing health disease and illness clinical applications of health and disease and normalcy genetic disease and enhancement the future of the concepts of health and disease the reader can see the evolutionary arc of medical concepts from the greek physician galen of pergamum ca 150 ce who proposed that the best doctor is also a philosopher to contemporary discussions of the genome and morality the editors have recognized a crucial need for a deeper integration of medicine and philosophy with each other particularly in an age of dynamically changing medical science and what it means medically philosophically to be human

this edited volume aims to better understand the multifaceted phenomenon we call health going beyond simple views of health as the absence of disease or as complete well being this book unites scientists and philosophers the contributions clarify the links between health and adaptation robustness resilience or dynamic homeostasis and discuss how to achieve health and healthy aging through practices such as hormesis the book is divided into three parts and a conclusion the first part explains health from within specific disciplines the second part explores health from the perspective of a bodily part system function or

even the environment in which organisms live and the final part looks at more clinical or practical perspectives it thereby gathers across 30 chapters diverse perspectives from the broad fields of evolutionary and systems biology immunology and biogerontology more specific areas such as odontology cardiology neurology and public health as well as philosophical reflections on mental health sexuality authenticity and medical theories the overarching aim is to inform inspire and encourage intellectuals from various disciplines to assess whether explanations in these disparate fields and across biological levels can be sufficiently systematized and unified to clarify the complexity of health it will be particularly useful for medical graduates philosophy graduates and research professionals in the life sciences and general medicine as well as for upper level graduate philosophy of science students
