at the close of the 18th century the ottoman empire still had huge military potential it was a complex structure of military provinces autonomous regions and virtually independent regencies the ottoman empire had a larger population than its land could actually support which resulted in bloated cities migration to under populated mountainous areas widespread banditry and piracy it also meant that ottoman armies had a ready pool of military manpower with numerous illustrations including eight stunning full page colour artworks by angus mcbride this fascinating text by david nicolle explores the armies of the ottoman empire from 1775 until 1820

byzantium was it greek or roman familiar or hybrid barbaric or civilized oriental or western in the late eleventh century constantinople was the largest and wealthiest city in christendom the seat of the byzantine emperor christs vice regent on earth and the center of a predominately christian empire steeped in greek cultural and artistic influences yet founded and maintained by a roman legal and administrative system despite the amalgam of greek and roman influences however its language and culture was definitely greek constantinople truly was the capital of the roman empire in the east and from its founding under the first constantinus to its fall under the eleventh and last constantinus the inhabitants always called themselves romaioi romans not hellniks greeks over its millennium long history the empire and its capital experienced many vicissitudes that included several periods of waxing and waning and more than one golden age its political will to survive is still eloquently proclaimed in the monumental double land walls of constantinople the greatest city fortifications ever built on which the forces of barbarism dashed themselves for a thousand years indeed byzantium was one of the longest lasting social organizations in history very much part of this success story was the legendary varangian guard the elite body of axe bearing northmen sworn to remain loyal to the true christian emperor of the romans there was no hope for an empire that had lost the will to prosecute the grand and awful business of adventure the byzantine empire was certainly not of that stamp

a military historian s enlightening reassessment of the famous 16th century naval battle between the ottoman empire and pope pius v s holy league the battle of lepanto has long been considered one of the decisive naval battles of history yet the savage fighting on october 7th 1571 left the strategic map unchanged the defeated ottoman turks were able to replace their losses and launch a new fleet the following year in lepanto 1571 historian nic fields reexamines the battle and concludes that its importance was psychological it sank the perception of ottoman dominance and the inevitability of islam s westward encroachment beyond the balkans with over 200 ships per side it was the largest naval battle in sixteen centuries and the last major fight between fleets composed entirely of the muscle driven galley these slender ships were the direct descendants of the classical trireme but carried cannon and marines bearing firearms although massed archery and cold steel still played a major role on the fateful day nic fields gives an excellent account of this fascinating and spectacular battle

although it is fashionable among modernists to claim that globalism emerged only since ca 1800 the opposite can well be documented through careful comparative and transdisciplinary studies as this volume demonstrates offering a wide range of innovative perspectives on often neglected literary philosophical historical or medical documents texts images ideas knowledge and objects migrated throughout the world already in the pre modern world even if the quantitative level compared to the modern world might have been different in fact by means of translations and trade for instance global connections were established and maintained over the centuries archetypal motifs developed in many literatures indicate how much pre modern people actually shared but we also discover hard core facts of global economic exchange import of exotic medicine and on another level intensive intellectual debates on religious issues literary evidence serves best to expose the extent to which contacts with people in foreign countries were imaginable often desirable and at times feared of course the pre modern world was much more on the move and reached out to distant lands out of curiosity economic interests and political and military concerns diplomats crisscrossed the continents and artists poets and craftsmen traveled widely we can identify for instance both the vikings and the arabs as global players long before the rise of modern globalism so this volume promises to rewrite many of our traditional notions about pre modern worldviews economic conditions and the literary sharing on a global level as perhaps best expressed by the genre of the fable
