first published in 1978 this reissue presents a seminal philosophical work by professor putnam in which he puts forward a conception of knowledge which makes ethics practical knowledge and non mathematic parts of the social sciences just as much parts of knowledge as the sciences themselves he also rejects the idea that knowledge can be demarcated from non knowledge by the fact that the former alone adheres to the scientific method the first part of the book consists of professor putnam s john locke lectures delivered at the university of oxford in 1976 offering a detailed examination of a physicalist theory of reference against a background of the works of tarski carnap popper hempel and kant the analysis then extends to notions of truth the character of linguistic enquiry and social scientific enquiry in general interconnecting with the great metaphysical problem of realism the nature of language and reference and the character of ourselves

a founding document in the area of study now known as the social sciences this treatise examines the rational philosophical basis for the study of human behavior society and history

first published in 1978 this reissue presents a seminal philosophical work by professor putnam in which he puts forward a conception of knowledge which makes ethics practical knowledge and non mathematic parts of the social sciences just as much parts of knowledge as the sciences themselves he also rejects the idea that knowledge can be demarcated from non knowledge by the fact that the former alone adheres to the scientific method the first part of the book consists of professor putnam s john locke lectures delivered at the university of oxford in 1976 offering a detailed examination of a physicalist theory of reference against a background of the works of tarski carnap popper hempel and kant the analysis then extends to notions of truth the character of linguistic enquiry and social scientific enquiry in general interconnecting with the great metaphysical problem of realism the nature of language and reference and the character of ourselves

what does morality have to do with psychology in a value neutral postmodern world according to a provocative new book everything taking exception with current ideas in the mainstream including cultural evolutionary and neuropsychology as straying from the discipline s ethical foundations psychology as a moral science argues that psychological phenomena are inherently moral and that psychology as prescriptive and interventive practice reflects specific moral principles the book cites normative moral standards as far

back as aristotle that give human thoughts feelings and actions meaning and posits psychology as one of the critical methods of organizing normative values in society at the same time it carefully notes the discipline s history of being sidetracked by overemphasis on theoretical constructs and physical causes what the author terms the psychologizing of morality this synthesis of ideas brings an essential unity to what can sometimes appear as a fragmented area of inquiry at odds with itself the book s interpretive pragmatic approach revisits core psychological concepts as supporting normative value systems traces how psychology has shaped society s view of morality confronts the naturalistic fallacy in contemporary psychology explains why moral science need not be separated from social science addresses challenges and critiques to the author s work from both formalist and relativist theories of morality with its bold call to reason psychology as a moral science contains enough controversial ideas to spark great interest among researchers and scholars in psychology and the philosophy of science

this book proposes an explicit recognition of criminology as a moral science a philosophically textured appreciation of the presence and role of values in people s reasoning and motivation set within an empirically rigorous social scientific account this endeavour requires input from both criminologists and philosophers and careful dialogue between them criminology as a moral science provides such a dialogue not least about the so called fact value distinction but also about substantive topics such as guilt and shame the book also provides philosophically informed accounts of morality in practice in several criminological contexts these include whistleblowing practices within a police service the dilemmas of mothers about who and what to tell about a partner s imprisonment and how persistent offenders begin to try to turn their lives around to desist from crime the issues raised go to the heart of some currently pressing topics within criminology notably the development of evidence based practice which requires some kind of stable bridge to be built between research evidence facts and proposals for policy evaluative recommendations
