social inclusion exclusion has only recently emerged in transport related discourse despite the apparent absence of a transport policy framework for social inclusion exclusion there has been some movement towards a greater understanding of the social aspects of transport in the research sphere this book brings together some of this research focusing on ethnicity an area that has so far had little discussion in the traditional transport literature thereby contributing to the exploration of the interface between transport and social exclusion in particular it examines the contribution that demand management measures can make to the reduction of the negative impacts of road based transport it questions whether methods such as road user charging and work place parking can be used as instruments for social inclusion and analyses the potential negative impacts of these schemes if sufficient attention is not paid to ethnicity issues
