during evolution there have been several major changes in the way genetic information is organized and transmitted from one generation to the next these transitions include the origin of life itself the first eukaryotic cells reproduction by sexual means the appearance of multicellular plants and animals the emergence of cooperation and of animal societies this is the first book to discuss all these major transitions and their implications for our understanding of evolution clearly written and illustrated with many original diagrams this book will be welcomed by students and researchers in the fields of evolutionary biology ecology and genetics

drawing on recent advances in evolutionary biology prominent scholars return to the question posed in a pathbreaking book how evolution itself evolved in 1995 john maynard smith and eörs szathmáry published their influential book the major transitions in evolution the transitions that maynard smith and szathmáry chose to describe all constituted major changes in the kinds of organisms that existed but most important these events also transformed the evolutionary process itself the evolution of new levels of biological organization such as chromosomes cells multicelled organisms and complex social groups radically changed the kinds of individuals natural selection could act upon many of these events also produced revolutionary changes in the process of inheritance by expanding the range and fidelity of transmission establishing new inheritance channels and developing more open ended sources of variation maynard smith and szathmáry had planned a major revision of their work but the death of maynard smith in 2004 prevented this in this volume prominent scholars including szathmáry himself reconsider and extend the earlier book's themes in light of recent developments in evolutionary biology the contributors discuss different frameworks for understanding macroevolution prokaryote evolution the study of which has been aided by developments in molecular biology and the complex evolution of multicellularity

this book discusses several recent theoretic advancements in interdisciplinary and transdisciplinary integration in the field of evolution while exploring novel views the text maintains a close link with one of the most broadly held views on evolution namely that of darwinian evolution this work puts forth a new point of view which allows researchers to define in detail the concept of evolution to create this conceptual definition the text applies a stringent object based focus with this focus the editor has been able to develop an object based pattern of evolution at the smallest scale subsequently this smallest scale pattern is used as an innovative basis for generalizations these generalizations create links between biological darwinism and generalized darwinism the object based approach that was used to suggest innovations in the field of

darwinian evolution also allowed for contributions to other topics such as major evolutionary transitions theory the definition of life and the relationships between evolution self organization and thermodynamics together the chapters of this book and the multidisciplinary reflections and comments of various specialists on these chapters offer an exciting palette of innovative ideas

a collection of 47 articles this monograph addresses critical needs and promising practices in career development the articles written both by leaders and new comers in career development offer extensive scholarship and new perspectives the volume is divided into six sections 1 foundations revisited 2 turbulence in career development what changes are occurring in career development and why 3 how career development is responding to different client populations 4 innovative tools and techniques that maximize the effectiveness of career development interventions 5 a look to the future of career development programs and practices and 6 a summing up and a leap to the future the span and depth of the essays portray the wide range of career transitions and the growing impermanence of careers themselves such transitions are viewed as a natural evolution and numerous strategies for changing jobs and for career development are provided here such disparate topics as transcultural career counseling education reform career needs of individuals with disabilities personality disorders global relocation career development groups ethics in career counseling and a look to the future are covered each article furnishes a short bibliography while an appendix offers special resources available related to career development rjm

social transition in china brings together the views of eleven chinese scholars as presented at the international symposium on socio economic transition and cultural reconstruction in china these contributors combine first hand knowledge of china with study in the united states to provide qualified assessments of the social changes brought about in china by the economic reform begun by deng xiaoping they examine the change to a free market a more democratic government and the modernization of china through the details of political change the rural atmosphere and the attitudes held by the people of contemporary china
