the main purpose of this book is to bring together some description of the skills and attitudes of those working in the hospice units specializing in terminal care with those rather different but overlapping skills used daily in the palliation of chronic or incurable disease this varied collection of papers does not pretend to be exhaustive among the omissions for example are two major causes of death chronic respiratory disease and stroke this is because the treatment of the end state of these conditions and they are not alone in this lies more in the gentle withdrawal of measures no longer appropriate rather than in any positive regime within the gift of the physician this may lead on occasion to an unjustifiable diminution of interest but this is less likely in cases of cardiac or malignant disease ischaemic heart disease remains the main killer of the western world we may see important changes in our approach over the next decade as we document slowly and painstakingly the comparative ineffectiveness of our therapy but in cases of progressive cardiac disease no matter how we may argue as to management or prevention

we are agreed that we must lighten the dreary burden of illness as effectively as possible

a superbly detailed presentation offering a wealth of practical guidance encompasses epidemiology incidence cause pathology diagnostic procedures therapy and clinical features for the entire spectrum of childhood neoplasms helps the reader in diagnosing malignancy recognizing and treating life threatening complications and in tailoring therapy to the individual based on age tumor histology stage of disease and a variety of other prognostic features

includes proceedings of the association papers read at the annual sessions and list of current medical literature
