during the last 30 years advanced architecture has consolidated an interactive and informational logic that differs from that of modernity and postmodernity this logic is

threefold it is modulated through three coexisting protocols modes of action whose peaks of intensity occur in three different decades conformative protocols 1990 2000 distributive protocols 2000 2010 and expansive protocols 2010 2020 this work proposes a threefold cultural narrative whose interactive and informational logic differs from that of modernity and postmodernity it positions three different ethos by critically approaching the architectural side of a cultural mutation that has been affecting the western experimental areas of knowledge and practice since the end of the last century a transformative process constituted by a constellation of transdisciplinary manifestations accelerations turns shortcuts and clusterizations that by no means can be read under one single epistemological umbrella in this sense rather than approaching the practice of architecture focusing on its disciplinary inner specificity this book approaches the research of experimental architecture focusing on its extra disciplinary entanglements it argues that a vast multiplicity of fields of knowledge participates in a cultural endeavour modulated through three protocols forms of action that singularize three decades conformative protocols 1990 2000 distributive protocols 2000 2010 and expansive protocols 2010 2020 these three periods shouldn't be read as three hermetic and concatenated monades but as three different modulations of the same narrative that is as three overlapping and coexisting systems whose peaks of intensity occur in three different decades however the main purpose of this book is not limited to unveiling the ethos of these three conjugations it also aims at using this framework as a time field a narrative map that moves from the classificatory to the cartographical in order to vectorize the last 30 years of experimental architecture in this sense this book argues that this threefold set of protocols represents the progressive attempt to constitute critical interiorities looking for and produced through interactions that are increasingly more intimate and whose agents are increasingly more diverse a tendency oriented towards the consolidation of an intimacy between strangers that highly resonates with the cultural and technological landscape in which experimental architecture operates

the industrial revolution caused a paradigm shift from an agrarian economy to a manufacturing economy giving birth to the industrial city city became synonymous with a concentration of factories causing unfiltered scenes between centres of production and urban dwellings the corrupted image of the city ultimately led to the displacement and separation of production away from residential zones in the 20th century however new innovative manufacturing technologies are allowing a coexistence between factories and dwellings through hybrid typologies that blend production back into the urban fabric this ad issue discusses the implications of the re emergence of production as an architectural and urban agenda through hybrid models that engage a new socioeconomic shift given the contemporary circumstances of a global pandemic affecting global supply chains it is necessary to deliver a vision for a new productive urbanism that allows autonomous circular economies to flourish our 21st century cities have an obligation to explore a new industrial revolution of shared economies that optimise the use of the legacy systems infrastructure and building stock yet it is ultimately up to architecture to take arms in delivering new typologies contributors frank barkow michele bonino and maria paola repellino kristiaan borret vicente guallart tali hatuka doojin hwang yerin kang and chihoon lee kengo kuma wesley leeman scott lloyd and alexis kalagas winy maas dk osseo asare marina otero verzier nina rappaport and shohei shigematsu featured architects barkow leibinger djh architects goldsmith kengo kuma associates mvrdiv oma and ten
