the evidence is increasingly persuasive we are changing the way our planet's physical systems work irrevocably these changes are global and interconnected and unavoidable they are upon us already making it virtually impossible for any modern society to continue its present trajectory of growth this book provides a penetrating analysis of how we have come to this point of why science and technology will fail to solve these problems and of how we as a society must change in order to avoid ecological catastrophe the scope is broad the urgency of the message is impossible to ignore

a change from a consumer society to a sustainable and conserver society must focus on for the welfare of the planet and future generations through balance rather than by maximizing the exploitation of resources this will bring about further growth as an option for both per capita consumption and the population muddled and tepid responses make it clear that the society has not developed a vision of what a truly sustainable society looks like it is essential to bring awareness to the possibility of creating a sustainable society which will incorporate sustainable development goals sdgs to generate a future with more possibilities in order to move towards a sustainable society it is vital to provide the highest standard of wellbeing from an environmental human and economic perspective we can contribute by providing technical and scientific studies that can be accessed freely and implemented by all these works cover the important parameters that can be addressed to achieve sustainability such as being energetically sustainable resource sustainable environmentally sustainable fiscally sustainable and socially sustainable

the natural step framework for sustainability is unique science based approach developed in 1989 and refined ever since it is a way of seeing the world that helps decision makers put sustainable development into action in this schumacher briefing david cook tells the story of the evolution of the organisation from its start in sweden to the present day whilst the fundamentals of tns remain the same it has responded to the ever evolving sustainability debate david provides an overview of the tns framework here

this book addresses the following question what is a sustainable society and how can higher education help us to develop toward it the core argument put forward is that the concept of sustainability reaches much farther than just the direct aspects of environmental threats and carbon emissions using higher education as a point of departure the book shows that sustainability involves a broad range of disciplines from nursing and nutrition to technology and management it argues that a sustainable society entails a distinct perspective on society that influences our social thinking in terms of ethics democracy and knowledge development the book also discusses if and if so how higher education can and should contribute to such a development based on the principles of the freedom of science in a liberal democratic society the book presents mutual competence building as a concept higher education can adapt in order to contribute to a sustainable society

this book explores time use time policy well being and sustainable development using concepts and findings from time policy research socio ecological sustainability research behavioral economics consumer research and research into prosperity and the good life because any change in time structures whether opening or working hours school or travel times has large scale impacts on other times that should ideally be recognized the political and social restructure and negotiations for more effective time policy must include cross cutting issues in the relevant sector policies family health consumer diet environment education

technology transport urban and labor market policy and develop time policy strategies and instruments specific to each sector this book is an interdisciplinary look into how society and government structure time policy the procedural component of and possibility of a transformation or improvement in time use i e the how of change what are transformation processes how can they be explained and how can change processes be ideally shaped this book outlines the possibility of a transformation to sustainability in time policy it will be of interest to researchers in economics social and political science social policy government quality of life studies and education

a collection of articles addressing the issue of whether the industrial model of human progress can be sustained in the long term it asks what the social political economic and environmental implications as well as potential solutions to the problem of resource intensive growth are

integrating aspects of philosophy political science and some environmental science this text provides a multidisciplinary approach to environmental economics and natural resources policy included is a chapter on value systems and the role of ethics

environment and society explores ways to promote the behavioural shifts necessary for creating a sustainable society through a critical approach to the links between sustainability policy and citizen engagement the book argues that sustainability policy needs to move towards a positive perspective utilizing the well known techniques of segmentation and social marketing such mainstreaming of sustainable lifestyles is likely to be the only effective means of engaging the majority of citizens in the environmental debate given the major influence of the consumer society on individual aspirations and beliefs comprised of three substantive elements environment and society explores the context for behaviour change policy the approaches adopted by politicians and academic researchers and the application of such approaches using empirical data from two major research projects the book is richly illustrated using both theoretical and empirical data and provides an excellent companion to all researchers interested in sustainable lifestyles

spaces of sustainability is an engaging and accessible introduction to the key philosophical ideas which lie behind the principles of sustainable development this topical resource discusses key contemporary issues including global warming third world poverty transnational citizenship and globalization combining the latest research and theoretical frameworks spaces of sustainability offers a unique insight into contemporary attempts to create a more sustainable society and introduces the debates surrounding sustainable development through a series of interesting transcontinental case studies these include discussions of land use conflicts in the usa agricultural reform in the indian punjab environmental planning in the barents sea

community forest development in kenya transport policies in mexico city and political reform in russia written in an approachable and concise manner this is essential reading for students of geography planning environmental politics and urban studies it is illustrated throughout with figures and plates along with a range of explanatory help boxes and useful web links

moving beyond the now widely accepted assertion that the current way of life in rich countries is not sustainable australian environmentalist trainer describes what a sustainable society might look like and suggest paths to get from here to there arguing that the basis must be more materially simple living standards and small scale self sufficient local economies he discusses housing food production energy the design of settlements the development of a new economy and the shift to new values the examples of change already implemented and measures to accelerate them focus on nudging local communities rather than overturning governments and corporations paper edition unseen 19 95 distributed in the us by humanities press annotation copyright by book news inc portland or

this book constitutes the proceedings of the 18th ifip wg 6 11 conference on e business e services and e society i3e 2019 held in trondheim norway in september 2019 the total of 61 full and 4 short papers presented in this volume were carefully reviewed and selected from 138 submissions the papers were organized in topical sections named e business big data analytics open science and open data artificial intelligence and internet of things smart cities and smart homes social media and analytics digital governance digital divide and social inclusion learning and education security in digital environments modelling and managing the digital enterprise digital innovation and business transformation and online communities

an energy tycoon real estate developer and philanthropist george p mitchell is also an idealist a big thinker who gave his time and fortune to the study of sustainability long before it became a household word jurgen schmandt who has worked for mitchell for many years explains and traces the idea of a sustainable society from its origin in the eighteenth century concept of the commons to its twentieth century iteration in the 1987 united nations report our common future he then chronicles mitchell s commitment to this idea from the early 1960s when the focus was on population growth to today when climate change and global warming dominate the debate mitchell advanced his belief that humankind could create a balance between economic and ecological well being by organizing and hosting conferences awarding prizes supporting scholars and scientists and funding research and publications he did it at the aspen institute at the woodlands conferences at the national academy of sciences at the mitchell center for sustainable development and at the houston advanced research center paradoxically he did not always do it in his own energy company documenting one important man s engagement with one important idea schmandt has preserved a significant episode in the ongoing quest to create societies that are capable of reaching and then sustaining a

decent quality of life for their citizens

since the first ecodesign international symposium held in 1999 this symposium has led the research and practices of environmentally conscious design of products services manufacturing systems supply chain consumption as well as economics and society ecodesign 2011 the 7th international symposium on environmentally conscious design and inverse manufacturing was successfully held in the japanese old capital city of kyoto on november 30th december 2nd 2011 the subtitle of ecodesign 2011 is to design for value innovation towards sustainable society during this event presenters discussed the way to achieve both drastic environmental consciousness and value innovation in order to realise a sustainable society

state of the world 2004 takes a fresh look at the trends that have put the global economy on a collision course with the earth s ecosystems this year s edition has a special focus on the theme of consumption it questions whether a less consumptive society is possible and concludes that it is essential the book explores overconsumption a by product of affluence and underconsumption linked to poverty and provides behind the scenes exposes of the devastating environmental impacts of some of our most popular products from plastic bags to paper to mobile phones published annually in 28 languages each edition draws on the breadth of expertise of worldwatch s award winning team of writers and researchers state of the world is relied upon by national governments un agencies development workers and law makers for its authoritative and up to the minute analysis and information it is essential for anyone concerned with building a positive global future
